**ON-CALL AGREEMENT FOR  
ANNUAL ON-CALL ENGINEERING SERVICE  
FOR THE RESOURCE RECOVERY PARK**

**THIS AGREEMENT** made and entered into this \_\_\_\_ day of \_\_\_\_\_, 2016 by and between the City of Lee's Summit, Missouri, a Missouri Constitutional Charter City, (hereinafter "City"), and Stearns, Conrad & Schmidt, Consulting Engineers, Inc. dba SCS Engineers (hereinafter "Engineer").

**WITNESSETH:**

**WHEREAS**, City desires to have on-call engineering services for the Resource Recovery Park landfill operation; and

**WHEREAS**, Engineer has submitted a proposal for the on-call engineering services and standard hourly rates and expenses to perform said services; and

**WHEREAS**, City desires to enter into an agreement with Engineer to perform the services as aforementioned; and

**WHEREAS**, Engineer represents that it is equipped, competent, and able to undertake such an assignment.

**NOW THEREFORE**, in consideration of the mutual covenants and considerations herein contained, **IT IS HEREBY AGREED** by the parties hereto as follows:

**ARTICLE I  
SCOPE OF ON-CALL SERVICES TO BE PROVIDED BY ENGINEER**

Engineer shall provide the following professional engineering services to the City on an on-call basis ("On-Call Services"):

**Task 1: Landfill Airspace Volume Calculations**

Engineer will provide services associated with the preparation of the 2017 annual volume calculations for the Lee's Summit Resource Recovery Park (LSRRP) sanitary landfill. Services will include subcontracting with a topographic mapping firm to prepare the appropriate map of the disposal and borrow areas at the site. The City or its representatives will provide ground control as necessary. The aerial survey will be conducted around the first of April.

Engineer will prepare a final report that summarizes the project. The summary will include appropriate drawings depicting existing topography remaining landfill airspace, and remaining borrow soil. Other information will include available soil quantities, refuse placed, waste-to-soil ratio, compaction factor, fill rate, and remaining life of the landfill. The City will provide tonnage reports for the period of time being reviewed and other waste estimates and operational information, as necessary.

**Task 2: Closure and Post-Closure Plan and Cost Estimate Updates**

Engineer will prepare the 2016 update to the closure and post-closure plans for the LSRRP sanitary landfill. These updates will include appropriate modifications to the LSRRP sanitary landfill closure and post-closure plans and update the cost estimates in July 2016 as required by 10 CSR 80-2.030(f)(B) 2.D. of the Missouri Solid Waste Management Law.

**Task 3: Progress and Regulatory Meetings**

Engineer will attend meetings at City request that may not be specifically related to other scope items.

**Task 4: Closure Coordination**

Engineer will assist the City with preparing for closure of the landfill as requested. Assistance may include quantification of bid items, modification to current design plan or details, cost estimation, or long-term evaluations of facility operations. This task will also include three quarterly volume estimates to be completed near the end of Quarter 3 2016, Quarter 4 2016, and Quarter 2 2017. Quarter 1 2017 volume estimates will be completed in conjunction with the annual airspace estimate completed as part of Task 1 above.

**Task 5: Title V Draft Permit Review**

As MDNR finalizes review of the air construction permit and Title V renewal applications submitted in December 2014, Engineer will review the draft permits and provide comments. Engineer may also be asked to provide more information to MDNR for their review of the submitted permit applications.

**Task 6: Title V Permit Modification**

Engineer will modify the existing construction permit to remove the rock crusher (if appropriate) and compost equipment that has been removed from the site. Work will be completed prior to September 2016 so that changes to the construction permit can be made instead of changes to the Title V permit draft.

**Task 7: Engineering Contract Support**

Engineer will assist the City by providing review and other information necessary to execute the third-party contract for services.

**Task 8: Little Blue Valley Sewer District (LBVSD) Permit Modification**

Engineer will make necessary modifications to the LBVSD permit as necessary to reflect modified flow of wastewater at the site to the sewer interceptor and the installation of laser flow meters.

**Task 9: Flow Meter Maintenance**

Engineer will contract with George Butler Associates, Inc. to calibrate, clean, and service as necessary two Teledyne Isco 2160 Laserflow surface velocity meters at the site on a quarterly basis. A report will be provided to summarize the quarterly activities completed.

**Task 10: On-Call Services**

Engineer will provide complete service as required for minor projects and reports pertaining to the LSRRP sanitary landfill operation as needed during the contract period. This work may include providing assistance for meetings with MDNR, the City Council, or the public.
