
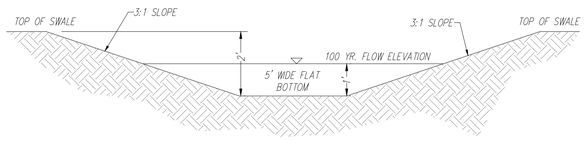
- BOTTOM OF SWALE TO BE 5' IN WIDTH
- CHANNEL SLOPE=2%
- MBOE OF BUILDING FOR LOT 1 = 1003.10
- MBOE OF BUILDING FOR LOT 2 = 1000.60



SWALE DETAIL
NTS

GENERAL NOTES:

The MBOE at the front of all lots to be a minimum of two (2) foot above the adjacent right of way elevation. Where the street carries by-pass from the 100-year storm, the MBOE at the front of the adjacent lots shall be a minimum two (2) feet above the corresponding top of curb.

This plan is not intended to serve as or substitute for an individual plot plan for each lot. It is intended only to show the: 1) finished grading before building of structures, 2) major drainage features, 3) designated drainage swales, 4) finish elevations of lot corners, 5) minimum building opening elevations (MBOE's) for structures, 6) lots where walkout or daylight basements are allowed, 7) limits of the regulatory floodplain and 8) required buffer zones of natural streams.

Additional grading between structures to provide positive drainage will be required as part of the plot plan review process.
