(flexibility on apparatus)

2019 No Tax Increase Bond Issue Project Information

Project Name: Fire Station #4

Estimated Project Costs: \$7,000,000 (Capital expense including land, building and fire apparatus)

Project Timeframe: This would be in conjunction with the larger overall scope of the re-development of the northern portion of the City regarding fire protection. This is anticipated to begin within a 2-3 year period.

Project Scope/Details: This project is the second part of the redeployment of first response units in the northern portion of the City. Station #4 has long since reached its maximum capacity and also due to its age and location, is in need of replacement as noted in the 2015 and 2019 Standards of Cover and the 2016 accreditation report, sections 2B.5, 6B.1 and 6B.4. With an additional station in the northern portion of the City, it is intended that the location of new Station 4 would be re-located, effectively creating 2 fire response areas out of the area that was previously served by current Fire Station #4.

Project Narrative (describe project value to public): This project will replace an existing station that is in need of replacement. This will also serve to redistribute Fire Department response apparatus to better serve the current population and development and provide a much more efficient location to serve the northern area of the City in anticipation of a large amount of future development. This approach addresses two concerns in the replacement of an aging and outdated fire station, as well as prepare for future growth and expansion of services in the northern portion of the City.

2019 No Tax Increase Bond Issue Project Information

Project Name: Fire Station #5

Estimated Project Costs: \$5,000,000 (Capital expense including land and building)

Project Timeframe: This project would replace current Fire Station #5 within 2-3 years

Project Scope/Details: Current Fire Station #5 has reached its capacity and can no longer accommodate additional units for further development or population expansion. This Station also does not conform to current standards on accommodations for personnel, technology advances, or health and wellness changes that have occurred for cancer prevention. Additionally the location of the current fire station #5 is not ideal to a long-term deployment plan, as described in the 2015 and 2019 Standards of Cover, and within the 2016 accreditation report sections 6B.1 and 6B.4.

Project Narrative (describe project value to public): This project will replace an existing station that has exceeded its service life. This will also serve to redistribute Fire Department response apparatus to better serve the current population and development and provide a much more effective location to serve the southern area of the City in anticipation of a large amount of future development. This approach addresses two concerns in the replacement of an aging and outdated fire station, as well as prepare for future growth and expansion of services in the southern portion of the City.

2019 No Tax Increase Bond Issue Project Information

Project Name: Police in car video system replacement and body worn camera

Estimated Project Costs: \$1,000,000

Project Timeframe: One (1) year

Project Scope/Details: Complete replacement of the current audio and video recording system in the patrol cars. Addition of body worn cameras and data storage solution.

Project Narrative (describe project value to public):

In car camera and body-worn camera systems are commonplace with policing in America. The camera systems provide transparency for the community and safety for law enforcement. In addition, both are great tools for capturing and documenting evidence of crime.

Our current system is unreliable and outdated technology. Picture quality, audio clarity, and range have all advanced. In addition, the degree of recording coverage has expanded with new technology. The courts have set expectations for securing and providing this electronic evidence. Failing to provide this evidence or losing this evidence due to antiquated systems leads to mistrust.

As of 2017, our current provider no longer supported the maintenance of our data server because of its age. In 2018, we discovered that the server hardware was no longer able to update because of its age. If the server were to fail, we would have no way of recovering the audio and video stored.

Society today has an expectation for transparency. Courts and Prosecutors rely on video and audio technology more today than ever. In many instances, it is more valuable than eyewitness testimony. Both systems have proven to provide additional evidence and perspective in critical situations.

2019 No Tax Increase Bond Issue Project Information

Project Name: Police/Courts Building Security Renovations

Estimated Project Costs: \$5.5 million

Project Timeframe: 2.5 years post-funding

Project Scope/Details: The police building was constructed just over twenty years ago. While the building remains structurally sound, security needs have become more heightened and it does not meet standards for security for police, the courts, or the prosecutor's office. A study was commissioned in January, 2019, for Treanor Architects to evaluate the building and produce recommendations for renovations, to address:

- Enhancing facility security and public access
- Improving customer service to the public through better design
- Increasing operational efficiency
- Meeting the needs of a workforce growing in diversity
- Providing work space that meets modern demands, thereby improving recruitment and retention of staff

While the study is not yet complete, the initial estimate to make building improvements to meet these needs is \$5.5 million.

Project Narrative (describe project value to public):

Unfortunately, threats to government facilities, to include police and courts, have grown over the past two decades. Modern police buildings have restricted public access, yet still provide a welcoming environment for the variety of police services needed. Modern courts have screening procedures yet public access for routine matters, such as obtaining court records or paying fines. The structure of the current Police and Courts Building in Lee's Summit does not meet these needs. However, renovations could work within the current facility to provide good security along with an excellent citizen experience.

Within the Police and Courts Building, workspaces have grown, operational structures have adapted, and laws have changed with have created a need to rethink space design. Ideally, buildings should be structured to provide a "flow" that maximizes operational efficiency. Over time, as buildings age, spaces move, are retrofitted, and personnel structures change and prior designs suffer as a result. The Police and Courts Building needs to be restructured to meet contemporary needs.

The Police Department workforce is becoming more diverse. The number of women working for the police department is growing and the current locker room facilities need to be expanded. It is anticipated that this growth will continue in the coming years.

The work spaces for the Police and Courts are functionally good, although there is room for improvement to provide conveniences similar to comparator jurisdictions nearby. This becomes important for the recruitment and retention of staff.

2019 No Tax Increase Bond Issue Project Information

Project Name: Network Infrastructure Priorities Phase I

Estimated Project Costs: \$975,000

Project Timeframe: 1 – 2 years

Project Scope/Details:

Replace existing aerial fiber with new buried fiber:

- Along Douglas from fire station one, to police headquarters.
- From The intersection of Hamblen Rd and Bailey Rd to Public Works operations.

Lay new fiber network to complete network connectivity to all city facilities.

- Connect Water via 3rd, Ward and Persels
- Connect Fire Station 2, via Scruggs and Colbern Rd.
- Connect Harris Park via Jefferson
- Longview Rec Center, via 3rd St.

Project Narrative (describe project value to public):

There are two components to these projects. Those include replacement of aging existing infrastructure, and development of new infrastructure.

The City currently owns aerial fiber runs that connect several critical facilities, including Police Headquarters, City Hall, Animal Control and Public Works Operations. These lines are showing their age and we have been notified by our contractors that repairs and splices are now difficult because the glass fibers have become brittle, and will soon reach a point where a repair might not be able to be made. The lines are also aerial, attached to existing telecommunication and power poles. These aerial lines run in areas where there is significant tree cover, increasing the likelihood of downed limbs severing the network connections. The first component of this would be to bury fiber optic in the following locations:

- Along Douglas from fire station one, to police headquarters.
- From The intersection of Hamblen Rd and Bailey Rd to Public Works operations.

City Hall is the hub of the City's communications network, and connectivity between City Hall and Fire, Police and other facilities to maintain public safety is the primary motivation to undertake these communications improvements.

Communication interconnectivity among the numerous City facilities (all types including City Hall, water facilities, public works facilities, fire, police, parks) is critical to a reliable communications network for public safety, both in terms of every-day public safety operations and in crisis situations resulting from serious weather events, natural disasters, fires, terrorism, public violence, shooting incidents and other life-threatening situations that require an immediate response and reliable communications.

Much of the network communications improvements relate directly to the other items in the combined question, including (1) communications improvements to the new fire stations, (2) enhanced

communications with the Police Station, and (3) improved wireless networked communications throughout the entire system to operate the new Police car video systems and body worn cameras. For example, this allows for watching live-time video at City facilities for personnel with in-vehicle or body-worn cameras that are out on an emergency call.

The Longview Recreation Center network improvements have a public safety component because that facility also serves as a storm shelter.

The City currently leases fiber network from the LS R7 school district to connect several of its facilities. The balance of phase of I is to implement city owned fiber to connect city facilities for IT needs, as well as support the growing need for fiber networks in other departments. Including Public Works, Police, and Fire.

NOTICE OF ACCESSIBILITY

FURTHER NOTICE IS GIVEN that, where a regular polling place has limited accessibility, a disabled or elderly voter may be provided an alternative means of casting his or her ballot. Such means may include reassignment to an accessible polling place, curbside voting, assisted voting or voting by absentee ballot. A voter may apply for an absentee ballot in person or by mail, or may have a relative or guardian apply in person on his or her behalf. If an absentee voter is disabled or incapacitated, the notary requirement is waived. In addition, voters requiring assistance may be assisted by a person of the voter's choice.
