Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

Lee's Summit has been an Entitlement Community of the Community Development Block Grant (CDBG) program through the Department of Housing and Urban Development (HUD) since 1994. The CDBG program provides annual federal funding to support local programs to achieve three National Objectives:

- Benefit low-to-moderate income persons,
- Address slum or blight and,
- Meet urgent needs.

Federal regulations require Entitlement Communities to conduct a community strategic planning process every 3-5 years to identify community needs, prioritize those needs and develop strategies to address the needs through the implementation of annual action plans. The Lee's Summit 2020-2024 Con Plan is a resulting document of this process.

The Con Plan process is a communitywide effort where public participation is encouraged. The process began with a community awareness campaign and provided multiple opportunities for public engagement. Community needs were identified and prioritized, strategies were developed, and goals and objectives were established to ensure priority needs of the community are addressed.

Prior to the start of the Con Plan process, the City conducted a community wide strategic plan visioning process as an effort to update its Lee's Summit 360 Strategic Plan. The process included a broad community participation and established seven (7) Critical Success Factors for the next strategic planning cycle. The Lee's Summit IGNiTE, as it is called, provides a vision and foundation for focused efforts in the coming years. During 2018 and 2019, the City conducted its 2019 Analysis of Impediments to Fair Housing Choices through community wide participation. In preparation for the con plan process, the City conducted extensive research and consultation throughout the community. Research through data gathering and analysis provided a meaningful depiction of what challenges the community had to face. Consultation resulted in a better understanding of what is available to the community currently and where the gaps remain.

LS IGNITE Critical Success Factors

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

The goals and objectives established in this Consolidated Plan are a reflection of community values through several community engagement processes, assessment of past successes and lessons learned in meeting community needs, research and analytical work and continuing efforts of the community's housing and public services agencies to improve the quality of life of the residents. The anticipated outcomes will be expanded services for basic needs, expanded and improved public services, improved housing conditions for the low income homeowners, increased public information, better coordination among agencies and organizations, and continuing effort to improve public transportation services.

3. Evaluation of past performance

The City, through years of consolidated planning and implementation of action plans of the CDBG program, has been able to understand the most critical needs of the community. The community understands that the CDBG funding is extremely limited and it must make sure funds are spent to have

the most impact. In the 2015-19 Consolidated Plan, 23 community needs were identified and 12 goals established. Through the program year's 2015-18 CDBG expenditure, the majority of the identified goals were accomplished. The City programs (Minor Home Repair and First Time Homebuyer) and services provided by other local and regional non-for-profit organizations utilized CDBG funds successfully to benefit individuals and households in need of affordable housing, home repairs, homeownership, food/clothing, emergency shelter and counseling, mental health and drug abuse counseling, and conflict resolution. Majority of the CDBG sub-recipients spent down funds on a timely basis whereas a small number of programs experienced delays, primarily due to demand change for service.

4. Summary of citizen participation process and consultation process

The following measures were put in place to ensure citizen participation throughout the Con Plan development. The citizen participation process included the following phases:

- Community Awareness – Social media announcements (including Facebook, Twitter, Nextdoor,) City podcasts, Alexa news briefing, City website, and articles in local newspaper
- Consultation – Consultation process included the following efforts:
- Web-based surveys for the general public were made available from September 18, 2019 to October 18, 2019 which generated 798 responses. Questions focused on housing and community development needs.
- Targeted Surveys – The City utilized ETC Institute, a local market research and survey company, to conduct a targeted survey within low income areas. This survey generated 300 responses from low-moderate income households in Lee's Summit.
- Business Surveys – Web-based surveys for local Mortgage Lenders, Developers and Broadband Providers. These surveys reached approximately 130 companies, and generated 25 responses.
- Open Houses – The City held two public Open House meetings during the planning process. These meetings provided information sharing and an invitation to the public for direct engagement in the process.
- Focus Groups and Meetings – Three Focus Groups were established based on a community interest form. These groups focused on the topics of Public Infrastructure, Housing and Public Services. The groups included citizens, community stakeholders and local public service agencies. The discussions focused on identifying community needs, prioritization of needs, developing strategies and identifying resources
- Consultation Surveys – Surveys were distributed to adjacent city governments, county government and regional planning organization (Mid-America Regional Council). No responses to the survey were received.
- Internal Consultation – Surveys were distributed to City departments to seek input on community needs and future efforts. Feedback received identified public infrastructure improvement needs and constraints of resources.

- Public Hearings – Opportunities for elected officials to hear public input on the draft plan and recommendations.
- Public Review and Comment Period – 30-day public comment period for the general public to review the draft plan and provide comments.

During the Con Plan public participation process, a number of community needs were brought by participants. Community input was assessed and identified needs were carefully prioritized later in the process. The following is a list of community needs mentioned (not in particular order of importance):

1. Sidewalks and curbing in established neighborhoods
2. Connection of neighborhood sidewalks to parks/trails
3. Storm drains in older neighborhoods
4. Long term transitional housing
5. Housing affordability: renters and owners
6. Maintenance of established neighborhoods
7. Rental inspections
8. Home ownership counseling
9. Transportation barriers
10. Accessibility to basic needs and services (food, shelter, clothing)
11. Access to and affordability of mental/behavioral Health 1
12. Street maintenance and additional street lighting on neighborhood streets
13. Access to affordable daycare

Some of the identified needs require further assessment before any actions are planned. The objective of the five-year consolidated plan is to focus on high priority needs and achievable goals in the next five years. However, the plan also serves the function of raising community awareness of issues that may not be able to be addressed during the current consolidated plan cycle.

Social Media Post

We want
YOUR
input

How should the City invest anticipated federal funding for the Community Development Block Grant over the next **5** years?

These funds must address one of the following:

- Low/Moderate Income Persons
- Slum/Blight
- Urgent Needs

Feedback gathered will be used to help determine how the City distributes funding from the U.S. Department of Housing and Urban Development (HUD).

Affordable Housing
Public Infrastructure
Public Services
Neighborhood Improvements
Home Repair Assistance
Youth & Elderly Programs
Broadband

Please participate in the City's process of developing its consolidated plan by attending one of the following:

1

Open House

Monday, October 21 | 5 - 7 p.m.
Water Utilities - Maybrook Conference Room
1200 SE Hamblen Rd, Lee's Summit, MO

2

Open House

Thursday, October 24 | 5 - 7 p.m.
City Hall - Strother Conference Room
220 SE Green Street, Lee's Summit, MO

Public Open House Poster

5. Summary of public comments

The public was consulted through surveys, focus group meetings and public open houses designed to obtain a glimpse of the public experience and perception as related to housing, living conditions, community services, public infrastructure, employment, economy and so forth. Key concerns coming out of these public comments include:

- Basic human needs (food, clothing and shelter)
- Mental health and substance abuse services
- Domestic violence shelter and services
- Transitional housing for clients following release from public services
- Inadequate affordable childcare
- Accessibility to community centers for persons of limited mobility
- Reinvestment in older and established neighborhoods
- Affordable housing
- Life skills counseling
- Transportation barriers
- Curb/sidewalk replacements

6. Summary of comments or views not accepted and the reasons for not accepting them

Public comments and views were collected through different methods and platforms throughout the con plan process.

- Public surveys seek responses to specific questions with an option for an open ended response
- Focus group meetings included brainstorming sessions and consensus sessions. During brainstorming sessions, a lot of comments and views were expressed
- Public open houses did not generate much input due to extremely low participation

The majority of the public comments focus on needs related to public transportation, sidewalks, affordable housing, property maintenance, affordable childcare, life skill training, job training, etc. There were random comments that represent individual's personal views that do not have a broad public base and do not represent the broad interest and value of the community.

7. Summary

The strategic planning process has been a communitywide public process. Through this process, the community recognizes the critical needs that must be addressed within the planning cycle. The most critical needs identified were needs of individuals and families that struggle due to lack of income, employment, abilities to support themselves and their families and services and financial assistance. These needs form the basis for local actions.

The Consolidated Plan highlights the high priority needs of the community and establishes short-term goals to address these needs. The Plan will serve as a guide for actions and funding priorities of annual action plans.

DRAFT

The Process

PR-05 Lead & Responsible Agencies 24 CFR 91.200(b)

1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

Agency Role	Name	Department/Agency
CDBG Administrator		Development Services

Table 1 – Responsible Agencies

Narrative

The City of Lee's Summit Development Services Department is responsible for the general administration of the Community Development Block Grant program. The CDBG Administrator manages the grant program under the supervision of the department administration manager. The staff team has the responsibility for preparing the Consolidated Plan, Annual Action Plans and Annual Performance Reports.

PR-10 Consultation - 91.100, 91.200(b), 91.215(l)

1. Introduction

The City of Lee's Summit Development Services Department coordinates the consultation process for the Community Development Block Grant Program 2020-2024 Con Plan and the subsequent Annual Action Plans and Annual Performance and Evaluation Reports.

The City completed a community wide strategic plan visioning process "Lee's Summit Ignite" recently and identified seven "Critical Success Factors". The strategic plan and the critical success factors are the direct result of a successful public consultation and engagement process and represent a wide range of community values, interests, and desires. The critical success factors provided a solid foundation for development of this consolidated plan. In addition, the City conducted its Analysis of Impediments to Fair Housing Choice (AI) between 2018 and 2019. Public consultation and engagement during the 18-month AI process provided valuable information for the City to identify community needs and set priorities, which helped with the Consolidated Plan development.

In light of the recent community planning and visioning and the AI processes and results, the Con Plan public consultation process was programmed to not duplicate what had already been done but rather to engage the community on focused topics: housing needs, infrastructure needs and public services needs. Methods used include information gathering from a variety of sources ranging from levels of governmental, non-governmental agencies, private businesses and organizations providing services to the community, and the general public and other stakeholders. Prior to the start of the public process, the City initiated a public awareness campaign with the assistance of the City's Creative Services Division via press releases, social media and the City's web site. Public participation events were made available to seek public input. Surveys, public open houses, focus groups, public hearing, and public review and comment period provided opportunities for public engagement throughout the Con Plan process. Surveys were conducted in numerous ways to maximize participation and representation, including online surveys, hard-copy surveys, and direct-mailing, emails, phone calls for targeted surveys. Response rates to these surveys vary. Focus groups were voluntary participation. Public open houses were of low attendance.

Comprehensive research and statistical analysis were conducted as the City prepared its AI. Statistical results and conclusions are used in developing the Consolidated Plan, unless otherwise stated in the plan.

Draft plans were made available for public review and comments. A public hearing was held by the City Council Community and Economic Development Committee (CEDC) on November 13, 2019 to gather additional public input prior to the plan approval by the City Council.

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

As a part of the recent AI process, the City reached out to public housing agency, transitional housing agency, homebuilders, public and private health, mental health and social service agencies, including state and county level governmental agencies to gather information regarding services to the community and input on future needs of the community in terms of housing, health, mental health and public services. During the Consolidated Planning process, some of these agencies participated in focus group discussions on specific topics and enhancement of coordination between agencies and services was a part of the discussion.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

Lee's Summit is in the service area of the Greater Kansas City Coc, The Greater Kansas City Coalition to End Homelessness (GKCCEH). The CoC is a regional network of various agencies, organizations and volunteers for the cause of ending the homelessness in the region. Agencies belonging to the CoC that have presence and service in Lee's Summit include Hope Housing and ReDiscover Mental Health Services. In addition to periodic contact with the GKCCEH, the City works closely with CoC participating agencies on an annual basis to identify needs and funding gaps.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

The City of Lee's Summit does not receive or distribute ESG funds. Local service providers and the area CoC participating agencies, such as Hope House and ReDiscover, work directly with the governmental agencies that distribute ESG funds through the CoC for local and regional services.

2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities

Table 2 – Agencies, groups, organizations who participated

1	Agency/Group/Organization	LEE'S SUMMIT HOUSING AUTHORITY
	Agency/Group/Organization Type	PHA
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Public Housing Needs
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Focus group discussion on housing needs. Identification of need for affordable housing for LMI persons and households and develop strategies to increase affordable housing in the City. Lee's Summit Housing Authority is implementing its strategic plan and is working closely with the City at many levels to meet is goal for additional affordable housing.
2	Agency/Group/Organization	HOPE HOUSE
	Agency/Group/Organization Type	Services-Victims of Domestic Violence
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Homelessness Strategy Homeless Needs - Chronically homeless Non-Homeless Special Needs
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in two focus groups with discussions on housing needs and public services needs. Identified needs for services and shelters for domestic violence victims and enhanced coordination between agencies to better serve their clients, such as improvement to the public transportation for clients who do not have own transportation. The agency is a participating regional CoC agency and contributed information and input on CoC services.
3	Agency/Group/Organization	REDISCOVER MENTAL HEALTH
	Agency/Group/Organization Type	Health Agency
	What section of the Plan was addressed by Consultation?	Non-Homeless Special Needs

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated focus group discussion on public services needs. ReDiscover provides shelter and counseling services for people with mental health needs. Information and knowledge provided helped with the identification of transportation needs for clients needing various public services. The agency is also a participating agency of the regional CoC and provided information and input on CoC services.
4	Agency/Group/Organization	City Departments
	Agency/Group/Organization Type	Grantee Departments Grantee Department
	What section of the Plan was addressed by Consultation?	Public infrastructure needs
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Numerous city departments were contacted via interoffice memo to complete a survey identifying community needs/gaps pertaining to public infrastructure and services they provide to the community and recommending strategies for future coordination among departments for improvements.
5	Agency/Group/Organization	Lee's Summit Social Services
	Agency/Group/Organization Type	Social services for persons of low or no income
	What section of the Plan was addressed by Consultation?	Basic needs of persons of low or no income
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in focus group meetings on housing needs. Identification of housing needs for persons and families such as those the agency serves and barriers to meeting those needs. Helped with priority setting and conversation regarding coordination among agencies to address the needs.
6	Agency/Group/Organization	Coldwater
	Agency/Group/Organization Type	Services-Children
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless Homeless Needs - Families with children Non-Homeless Special Needs

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in focus group discussions on public services needs. Identification of the basic needs of the low or no income persons and families, such as food, clothing, housing, accessibility to services and coordination of agencies to improve accessibility.
7	Agency/Group/Organization	Lee's Summit Cares
	Agency/Group/Organization Type	Services-Children Services-Education
	What section of the Plan was addressed by Consultation?	Non-Homeless Special Needs
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in focus group discussions on public services needs. Helped identify needs and caps for youth services ranging from substance abuse to prevention of bullying to mental health and wellbeing.
8	Agency/Group/Organization	Mid America Regional Council
	Agency/Group/Organization Type	Regional organization
	What section of the Plan was addressed by Consultation?	Market Analysis
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency was consulted regarding the regions Hazardous Mitigation Plan. The City works closely with this agency and participates in the Regional Hazardous Mitigation Plan. This Plan contains new information about the tools or capabilities available to communities as they work toward mitigating hazards.

Identify any Agency Types not consulted and provide rationale for not consulting

During the City's strategic plan visioning process and AI process, a wide range of agency types were invited to the consultation and engagement process. During the development of the Consolidated Plan, in addition to the above listed agency types, the City tried to seek consultation with other public and private agencies, such as neighboring city governments, county governments, regional planning organization, with limited responses and participation. Regional CoC consultation was limited to local participating agencies in the CoC network. There was no intention of excluding certain agency types for consultation. On broadband needs, several broadband/internet service providers were contacted for consultation with low responses. However, service providers and programs working with local public school district did provide information.

Other local/regional/state/federal planning efforts considered when preparing the Plan

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
Continuum of Care	Greater Kansas City Coalition to End Homelessness	Implementing local strategies to assist CoC participating agencies in addressing local and regional needs.
Lee's Summit Ignite Strategic Plan	City of Lee's Summit	The Consolidated Plan goals are intended to advance the "Critical Success Factors" established in the Lee's Summit ignite Strategic Plan.
Analysis of Impediments to Fair Housing Choice	City of Lee's Summit	The Consolidated Plan goals are intended to address needs identified in the AI.
Regional Hazard Mitigation Plan	Mid America Regional Council	Implementing regional strategies to address both local and regional needs.

Table 3 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

Lee's Summit is an active participants in regional cooperation and coordination efforts and programs for advancing regional goals in areas related to transportation, public infrastructure improvements, growth patterns, economic growth, senior services, historic preservation, homelessness, public safety, mobility, etc. Mid-America Regional Council, a regional planning and coordinating organization, provides direct linkages for regional participation and coordination on a wide range of regional issues. During the Consolidated Plan process, neighboring city governments, county government agencies and Mid-America Regional Council were contacted to complete a survey.

Narrative (optional):

PR-15 Citizen Participation

1. Summary of citizen participation process/Efforts made to broaden citizen participation Summarize citizen participation process and how it impacted goal-setting

The following measures were taken to encourage citizen participation:

- Public awareness
- Dissemination of public information
- Open houses (2)
- Public and targeted surveys
- Public focus group meetings (three groups of two meetings each)
- Web-based outreach through various methods of social media
- Public Review and Comments

To ensure better coverage and representation across all spectrums of the population, the City made an effort to utilize as many outreach methods as financially feasible to reach the public. They include social media outlets such as Facebook, Twitter and Nextdoor, the City website, community publications, newspaper advertisements and articles, direct e-mails and direct mailing, online and paper surveys and help from local service agencies.

Using a Community Interest form, the City formed volunteer Focus Groups compiled of citizens, local non-profit housing leaders and public service agency representatives. During these discussions, community needs were identified and prioritized. The groups worked together to identify resources and devise short-term and long-term strategies to address the priority needs. The resulting recommendations laid a solid foundation for setting goals. Additionally, information collected from the public through surveys also played an important role in recognizing the community needs and establishing community goals. Public meetings and public hearings provided added opportunities for the public to contribute to the discussion of community needs and focus.

Citizen Participation Outreach

Sort Order	Mode of Outreach	Target of Outreach	Summary of response/attendance	Summary of comments received	Summary of comments not accepted and reasons	URL (if applicable)
1	Focus Group Meetings	Non-targeted/broad community	3 groups: attended by local citizens, local service agencies and community stakeholders.	Identified and established top priorities in areas of housing, infrastructure and public service needs. Discussed leverage options and community groups that could help support these goals.	N/A	
2	Public Open House (1 of 2)	Non-targeted/broad community	extremely low attendance	N/A	N/A	
3	Public Open House (2 of 2)	Non-targeted/broad community	Low attendance	N/A	N/A	

Sort Order	Mode of Outreach	Target of Outreach	Summary of response/attendance	Summary of comments received	Summary of comments not accepted and reasons	URL (If applicable)
4	Public Surveys (2) Online	Non-targeted/broad community Developers and Mortgage Lenders	Over 800 responses received.	Survey results indicated top priorities of Sidewalk/Street Improvements, Housing for Seniors and Veterans and Job Training for LMI.		
5	Targeted Public Survey through Direct Mailing	Low-Mod Income Residents	300 responses were received from low-income residents	The survey results indicated that the top priority focus areas for utilizing CDBG funds over the next five years are 1) Public Infrastructure, 2) Public Services, and 3) Housing.		
6	Internet Outreach	Non-targeted/broad community	Public awareness/information only.	N/A	N/A	

Table 4 – Citizen Participation Outreach

Needs Assessment

NA-05 Overview

Needs Assessment Overview

The Needs Assessment is a process for the community and stakeholders to identify housing needs, homeless needs, non-housing special needs, public services, broadband needs, and community development needs. Housing needs are determined by numerous factors such as the availability, affordability, and conditions of housing, as well as the challenges associated with housing occupancy or overcrowding. Homeless housing needs are essentially assessed at regional levels in non-central city environment, as discussed elsewhere in this report regarding the regional CoC. Non-housing needs largely focused on public services for low-to-moderate income (LMI) persons and persons with special needs, public facility and infrastructure improvement needs to provide better services to LMI persons and areas, and economic development needs.

For this Con Plan, a needs assessment was accomplished through multiple recent planning and analysis efforts, including the Lee's Summit Strategic Plan "Lee's Summit Ignite" and Analysis of Impediments (AI) to Fair Housing Choice as well as the Con Plan progress. When the AI was conducted, extensive analytical work and the public input process were completed, and that information is incorporated into this Con Plan. The City also hired an outside surveying company, ETC Institute, to administer a targeted needs assessment survey to ensure input was received from low to moderate-income households.

NA-10 Housing Needs Assessment - 24 CFR 91.205 (a,b,c)

Summary of Housing Needs

In a business world, it is important to understand the supply and demand. The same holds true for housing. While housing needs can be examined in a wide range of categories, it is essentially a function of supply and demand. The supply includes existing housing stock in a community and the new construction as an addition to the community's housing stock. Furthermore, other aspects of the supply can be equally important, such as the condition, size, location, style, distance to services, and price. The demand can be seen as the desire or need for housing of a certain type, size, location, and price, to name a few. So assessing the balance of supply and demand for housing for a given community is not simply a matter of comparing the two in terms of total numbers. It is more of a match for a housing type of certain characteristics.

On the broadest level, assessment of housing needs should include analysis of housing costs and household income levels, analysis of diversity of housing and local demographics, etc. When considering only housing costs and household income levels, a total 29% of the households in Lee's Summit are low to moderate income, according to the 2011-15 CHAS data presented in Table 6. Approximately 60% of all households with at least one person age 75 or older are low to moderate income households. These households bear the greatest housing cost burdens. Housing cost burden is particularly serious for the extremely low income segment of the households (households earning between 0% and 30% HAMFI). Data also suggests that households with small children also bear heavier burdens than households without young children or senior adults.

Based on the statistics, the current housing stock and new housing market do not provide sufficient affordable housing for LMI households.

Demographics	Base Year: 2009	Most Recent Year: 2015	% Change
Population	91,364	93,620	2%
Households	29,336	34,055	16%
Median Income	\$74,605.00	\$78,377.00	5%

Table 5 - Housing Needs Assessment Demographics

Data Source
Comments:

Describe the number and type of single person households in need of housing assistance.

There is no data available for this analysis.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

While a lack of local data makes it difficult to assess, based on the number of people housed and on the wait list of Hope House, the community domestic violence shelter, there are as few as 100 individuals, and as many as 2,500 that are in need of housing assistance for victims of domestic violence, dating violence, sexual assault, or stalking. These numbers are based on information provided by Hope House and may include individuals from outside of the Lee’s Summit area.

For those individuals in Lee’s Summit that are classified as disabled, there is also little data. The Lee’s Summit Housing Authority does note on its waiting lists the existence of families with disabilities, which represent 19.5% and 28.0% for public housing, and Section 8 vouchers respectively.

What are the most common housing problems?

Records suggest that existing older homes in Lee's Summit are generally in the affordable range for the majority of LMI households, yet newly constructed housing is generally beyond the reach of these households. The most common housing problem is the burden of housing cost greater than 50% of income. This affects almost 3,500 renter and owner households in Lee's Summit of all income groups. Although there exist households in Lee's Summit that are encumbered by overcrowding, or substandard facilities, the proportion that are spending greater than half of the area median family income is far greater. Based on the HUD data, approximately 340 households are overcrowded, and 240 households live in substandard physical conditions.

Are any populations/household types more affected than others by these problems?

More overcrowded households are renters than homeowners. Renter households also bears greater housing cost burdens. Households with seniors or young children have greater housing burdens.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Limited data is available for this analysis. As data provided by HUD, families with senior and young children tend to have heavier housing burdens. Hillcrest Transitional Housing in Lee's Summit provides short-term transitional housing to assist homeless families to move towards permanent housing. Hope House provide domestic violence shelter for victims and after completing the program, some clients have a safe place to go to while others may not.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

Lee's Summit does not do estimates of at-risk population. However, the City's CDBG program has supported agencies that work to prevent homelessness.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

Older housing units occupied by low-to-moderate income households have more needs for home repairs to ensure safe and decent living conditions. Without assistance, these homes may potentially become uninhabitable and unsafe to occupy.

Discussion

DRAFT

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

Generally, when compared to the racial or ethnic group proportions of the city population as a whole, the incidence of poverty is not higher among minority families in Lee’s Summit than it is among White families. As a share within a single racial or ethnic group however, there is a significantly higher frequency of poverty among minority groups, as outlined below in the discussion section. As mentioned, when the incidence of housing problems by each income category is analyzed, it appears that income level rather than race or ethnicity is the primary factor affecting the incidence of housing problems.

0%-30% of Area Median Income

Housing Problems	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems

2. Lacks complete plumbing facilities,
3. More than one person per room,
4. Cost Burden greater than 30%

Discussion

According to HUD's definition, a "disproportionately greater need" exists when the percentage of households in a category of need who are members of a particular racial or ethnic group is at least 10 percentage points higher than the percentage of households in the category as a whole. Considering this, and cumulative total from the data tables above, there are 8,025 of the 34,055 households (or 24% of all households) in Lee's Summit with one or more of the four housing problems. Of that total, 2,270 have an extremely low income (0%-30% HAMFI), 2,080 are low income households (earning between 30%-50% HAMFI per year), and 2,665 are moderate income households (earning between 50%-80% HAMFI). 1,010 households having one of the four housing problems earn above 80% HAMFI. Whites have the highest number of households with housing problems, followed by Black/African American and Hispanic households.

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

As with assessing housing problems, disproportionately greater need resulting from severe housing problems exist when the percentage of households in a category of need, who belong to a particular racial or ethnic group, is at least 10 percentage points higher than the percentage of households in the category as a whole. Per the HUD definition, severe housing problems exist when there is the incidence of at least one of the following housing problems:

- Lack of complete kitchen facilities,
- Lack of complete plumbing; overcrowded households (more than 1.5 persons per room, not including bathrooms, porches, foyers, halls, or half-rooms),
- Cost burden greater than 50% of a household's income.

0%-30% of Area Median Income

Severe Housing Problems*	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems

Data Source: 2011-2015 CHAS

*The four severe housing problems are:

1. Lacks complete kitchen facilities,
2. Lacks complete plumbing facilities,
3. More than 1.5 persons per room,
4. Cost Burden over 50%

Discussion

There is a marked correlation between income level and the extent of housing problems experienced by Lee’s Summit households. Based on the data above provided by HUD, there are 4,180 households, or 12% of all households in Lee’s Summit, identified with one or more severe housing problems. Of that total, 2,030 have an extremely low household income (0%-30% HAMFI), 1,020 are low income households (earning between 30%-50% HAMFI per year), and 820 are moderate income households (earning between 50%-80% HAMFI). 310 households experiencing severe housing problems earn above 80% HAMFI.

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction:

Among the households in Lee’s Summit, numerous are considered subject to a housing cost burden. This is defined as any household that pays more than 30% of its annual income on housing related expenses, thereby making it more challenging to also pay for clothing, nutrition, transportation, medical and other needs. Along with this, it is important to understand that disproportionately greater need exists, by HUD definition, when the percentage of households in a category of need who are members of a particular racial or ethnic group is at least 10 percentage points higher than the percentage of households in the category as a whole. The tables below display household data related to housing cost burden.

Housing Cost Burden

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	24,980	4,895	3,920	260
White	21,930	4,045	3,335	185
Black / African American	1,670	620	420	50
Asian	425	40	15	10
American Indian, Alaska Native	75	0	0	0
Pacific Islander	60	45	0	0
Hispanic	520	95	95	15

Table 21 – Greater Need: Housing Cost Burdens AMI

Data Source: 2011-2015 CHAS

Discussion:

In Lee’s Summit, almost three-quarters of all households (72.2%) spend less than 30% of their income on housing costs. With the exception of American Indians, with 49.3%, at least 50% of every racial or ethnic group spends 30% or less of income on housing. White households enjoy the largest proportion of those spending 30% or less on housing, with 74.0%.

Overall, 17.6% of households in Lee’s Summit spend 30-50% of income on housing costs. American Indians/Alaska Natives are disproportionately affected, as 43.5% are classifiable as enduring a housing cost burden, followed by 32.8% of Blacks/African Americans. As with discussion regarding housing

problems and severe housing problems, both of racial or ethnic groups in this housing cost burden category, although disproportionately affected, represent 2.4% of the Lee's Summit households.

Lastly, 9.86% of all households in Lee's Summit spend more than 50% of their income on housing. Pacific Islanders are disproportionately affected in this category, with 50.0% of the 30 households spending over half of their income on housing. White households with a greater than 50% housing cost burden, while representing only 1.0% of White households in the category, number 2,455, which is more than the total of all other racial and ethnic classification in this category combined.

DRAFT

NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

Table 21 includes 2011-2015 CHAS data depicting housing cost burdens for Lee's Summit households by racial/ethnic groups. Based on the statistics, Black households had a higher percentage than the City as a whole that spent more than 30% of the household income on housing related cost. Pacific Islander households had the highest percentage but a much smaller number of households were impacted by housing related burdens.

If they have needs not identified above, what are those needs?

There are no local data to indicate that the most affected racial and ethnic groups identified above have greater needs in other non-housing related categories.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

There is no obvious pattern of geographic concentration of racial and ethnic population.

NA-35 Public Housing – 91.205(b)

Introduction

The Lee's Summit Housing Authority (LSHA), the only local public housing agency, has two developments; Duncan Estates and Lee Haven Apartments, with a combined total of 116 dwelling units. The LSHA through its 5-Year Plan (10/01/2015 through 09/30/2019) has implemented several capital improvements to the property and dwelling units. During this period, LSHA completed, utilizing City's CDBG funds and HUD Capital Improvement funds, HVAC replacement, exterior door replacement and bathroom replacements to most of the residential units.

The LSHA will continue its strategic plan identified improvements and efforts to promote affordable housing development in the City. It is in process with the development of its next 5-Year Plan document that will cover the period of 10/01/2015 through 09/30/2020. HUD provides Capital Funds annually to Public Housing Agencies (PHAs) for the development, financing, and modernization of public housing developments and for management improvements. The LSHA's backlog of capital needs continues to grow and it severely hampers the use of the few redevelopment tools available such as the Rental Assistance Demonstration program (RAD) and Demolition/Disposition.

The LSHA maintains a waiting list for its 116 subsidized low-income public housing units. It has adopted a "local" preference for the waiting list. The preference is for persons who are at least 62 years of age or older or handicapped/disabled; called an "Elderly" preference. Persons with this preference are placed ahead in the waiting list over those applicants without a preference.

The LSHA also administrates a Section 8 Housing Choice Voucher Program for residents of Lee's Summit and Greater Jackson County. Our Section 8 Housing Choice Voucher Program currently stands at a base-line of 649 vouchers. The LSHA implemented several significant changes in the HCV program, as a result of funding constraints. These allowable discretionary changes were implemented in an effort to continue to support families currently leased in place. The LSHA manages the HCV waiting list based on availability of funding, voucher turn-over and estimated wait-time; through opening and closing the list to new applicants.

Data Source: PIC (PIH Information Center)

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

Based on the LSHA 5-year plan, of the total applicants combined for the Public Housing Program and Section 8 Housing Choice Voucher Program; there are fewer than an estimated total of 5% of all applicants that have indicated a definite need for 504 Accessibility. There are currently two low income public housing residents who are being accommodated with accessible units.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

Public Housing Waiting List: 820 total applicants; of that total, 336 have a preference in the waiting list thus defined; “persons who are 62 years of age or older or handicapped/disabled persons”. There are 519 applicants classified as “family”. Of the total 820 applicants, 174 are handicapped/disabled; 694 families are classified as extremely low income, with the remaining classified as low to moderate income households.

Section 8 Housing Choice Voucher Program: 756 applicants total, of that total 33 are elderly, 65 are handicapped/disabled and 660 are family; of these 651 are extremely low income households, with the rest classified as low to moderate income households. The Housing Authority has recently held several rounds of Section 8 Briefings, resulting in issuance of vouchers and purging of the waiting list, and as a result the waiting list is presently open with the Housing Authority receiving more new applications daily.

Affordable and accessible housing are the most immediate needs of the families on LSHA waiting lists. The Lee’s Summit Housing Authority has 116 units of low-income Public Housing and a waiting list of 820 applicants. The Section 8 Housing Choice Voucher Program has a base-line of 649 families that can be served with a waiting list of 756 applicants with unmet housing needs, with more submitting applications to the waiting list daily. Given this information, it is assumed based on these numbers that there is a lack of affordable and accessible housing available. The most immediate needs for those on LSHA waiting lists is safe, decent, affordable and accessible housing for low income households.

How do these needs compare to the housing needs of the population at large

These numbers do not reflect data that may be available in the Census data or other sources; which may identify larger numbers of elderly, disabled, handicapped, families and individuals with unmet housing needs in the greater jurisdiction.

Discussion

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction:

The City does not independently compile statistics and conduct field checks to identify the homeless population inside the City. The regional CoC, the Greater Kansas City Coalition to End Homelessness, collects and analyzes homeless data as required of a CoC for the area that covers the City of Kansas City, MO., Kansas City, KS., City of Independence, City of Lee's Summit, Jackson and Wyandotte Counties. Based on the Coalition's most recent 2017 Annual Report and Point-In-Time (PIT) data, there were a total of 1,248 households that were homeless in 2017 with 1,671 adults and children in the CoC area. The CoC's 2018 PIT data suggest there was a slight increase in the total number of homeless households (1,346). The statistics provided below represent the CoC's counts for the entire area. The CoC data does not provide homeless population by subarea distribution.

Homeless Needs Assessment

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Persons in Households with Adult(s) and Child(ren)	18	580	0	0	0	0
Persons in Households with Only Children	1	19	0	0	0	0
Persons in Households with Only Adults	305	875	0	0	0	0
Chronically Homeless Individuals	170	246	0	0	0	0
Chronically Homeless Families	0	0	0	0	0	0
Veterans	35	108	0	0	0	0
Unaccompanied Child	12	103	0	0	0	0
Persons with HIV	0	14	0	0	0	0

Table 26 - Homeless Needs Assessment

Data Source Comments:

Indicate if the homeless population Has No Rural Homeless
is:

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

No local data or information available.

DRAFT

Nature and Extent of Homelessness: (Optional)

Race:	Sheltered:	Unsheltered (optional)
White	0	0
Black or African American	0	0
Asian	0	0
American Indian or Alaska Native	0	0
Pacific Islander	0	0
Ethnicity:	Sheltered:	Unsheltered (optional)
Hispanic	0	0
Not Hispanic	0	0

Data Source
Comments:

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

No disaggregated data exists for the area within the boundaries of Lee’s Summit.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

No disaggregated data exists for the area within the boundaries of Lee’s Summit. The CoC wide data suggests that the homeless population does not lean more heavily towards any one particular racial and ethnic group based on the racial and ethnic composition of the Kansas City region. Whites and Blacks/African Americans account for a majority of the homeless population.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

No disaggregated data exists for the area within the boundaries of Lee’s Summit. Based on the CoC 2018 PIT report, households without children are significantly less likely to be in shelters than households with children or households with only children. Hispanic/Latino homeless persons are less likely in shelters than non-Hispanic counterpart. Female homeless population had a higher percentage of living in shelters and males.

Discussion:

Local agencies providing assistance and housing, such as Hope House, Lee’s Summit Social Services, ReDiscover, the Lee’s Summit Housing Authority, Hillcrest Transitional Housing and the network of members working with GKCCEH often have a high demand for their services. Extremely low income

households that pay over 50% of their income on housing need or request some form of assistance from a local service agency to avoid homelessness.

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction:

Among the non-homeless special needs identified in the 2020-2024 Consolidated Plan process, some determined to be of high priority require long term and regional solutions involving cooperation and coordination of many agencies, such as public transportation needs and homeless needs. Other non-homeless special needs focus on mental health, substance abuse, and other preventative programs.

Describe the characteristics of special needs populations in your community:

The non-homeless special needs population of Lee's Summit is comprised of the elderly, persons with disabilities, persons with mobility issues, persons of low income, persons with mental health issues, persons of limited job skills, persons with substance abuse issues, and persons experiencing domestic violence. Within the population of elderly, there are individuals more specifically categorized as "Frail Elderly," defined as any individual who is unable to perform at least three "activities of daily living" comprising of eating, bathing, grooming, dressing, or home management activities. The City is a participating jurisdiction in the metro area's Community for All Ages initiative and certification program. As a part of the initiative, efforts are being made to identify issues and needs of the elderly population experiencing or exposed to abuse and explore ways to help address them.

What are the housing and supportive service needs of these populations and how are these needs determined?

The aging population and the trend to age in place presents need to give more consideration to accessibility through universal design, remodel of existing housing to accommodate mobility constraints, convenient transportation to services and senior supportive services. In recent years, Lee's Summit has seen increased development activities to provide both housing and services designed to meet senior needs. However, these activities are limited to development of new establishment.

Temporary housing or shelter for clients of public services who are released from programs but need place to stay until they are ready for permanent housing. This need was expressed by multiple local public service agencies that experienced the situations where their clients completed their program and were ready to be released but found themselves nowhere to go but to go back to the original situation, which is not always ideal for them to go back to.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

According to the Missouri Department of Health and Senior Services' 2016 Report, there were a total of 3,166 individuals with HIV living in Jackson County. Lee's Summit does not receive HUD funding to address HIV needs.

Discussion:

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

With an increasing demand for availability and safe sidewalks in neighborhoods, particularly in older neighborhoods, the City compiled an inventory of existing sidewalks and areas with missing sidewalks or deteriorated and deteriorating sidewalks some years ago in an effort to address the need. When resources were made available, high priority areas were improved by filling in the gaps and replacing the unsafe sidewalks. However, due to lack of funding, the need still exists today.

How were these needs determined?

Sidewalk needs were determined by a comprehensive inventory and assessment ten years ago of the existing sidewalk system throughout the City. The sidewalk improvement program has been implemented dependent on funding availability over the years and identified needs have not been completely met. In addition, through the public participation process of the Con Plan, the need for improvements of sidewalks was raised as one of the priorities, especially in older part of the City where sidewalks were not required at the time subdivisions were built.

Describe the jurisdiction's need for Public Improvements:

The City's Capital Improvement Plan (CIP) is a tool for public improvement planning and financing. Transportation infrastructure needs are determined through updates to the City's Thoroughfare Master Plan and License Tax program. Parks and Recreation needs are determined as the department prepares its park master plan and trail master plan. The need for additional park facilities is normally a result of new growth. The public input through the participation process raised concerns about flooding in residential homes during heavy storms and called for improvements to older areas of the City where the storm water system is substandard.

How were these needs determined?

The needs were determined through local planning, analysis, capital improvement financing and public input.

Describe the jurisdiction's need for Public Services:

Local public service providers have been providing critical services for years to address the needs for those types of services. While existing regional and local agencies and organizations provide varieties of public services, needs for such services are always greater than their capacity and resources. In addition,

other needs have become known, such as the most recent opioid abuse, vaping, and rising suicide rate among youth.

How were these needs determined?

Public service providers have the first-hand knowledge of the need for their services and programs. Through public consultation, the information was shared. Public participation through surveys, focus group discussions and open houses also revealed concerns from the public.

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview:

Housing statistics are provided in the following sections by HUD using 2011-2015 ACS five-year estimates. The Consolidated Plan interprets housing patterns based on the data provided since local data is not available to the level of detail.

According to Table 27—All Residential Properties by Number of Units, there are 35,970 housing units in the City of Lee’s Summit, MO. Table 28—Unit Size by Tenure, shows that there are 25,930 owners and 8,115 renters. This, of course, brings up the obvious point that these numbers are based on a summary of 5 year survey data and not 100% data. However, these statistics can be easily summarized by stating that approximately 72% are owners and 28% are renters. The City of Lee’s Summit is primarily comprised of single-family detached dwelling units. Both home owners and renters in Lee’s Summit have a preference for 3+ bedrooms. About two thirds of the City’s housing stock was constructed after 1980. There is still plenty of room to grow in Lee’s Summit.

According Table 33—Condition of Units, the majority of owner-occupied housing units either have no selected conditions or one selected condition. The “selected conditions” that are being considered are from the Census Bureau’s term “selected conditions” which is defined in the American Factfinder’s Glossary (<https://factfinder.census.gov/help/en/index.htm#glossary.htm>) as “having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30 percent, and 5) gross rent as a percentage of household income greater than 30 percent.” The terms “complete plumbing facilities” and “complete kitchen facilities” are defined as follows:

- “Complete plumbing facilities include: (1) hot and cold piped water; (2) a flush toilet; and (3) a bathtub or shower. All three facilities must be located in the housing unit.”
- “A unit has complete kitchen facilities when it has all of the following facilities: (a) cooking facilities; (b) refrigerator; and (c) a sink with piped water.”

The cost of housing in Lee’s Summit has experienced a steady increase over the years. Homeowners of low income and renters of low-to-very-low income do not have sufficient housing choices in Lee’s Summit. Only the existing older housing is affordable for low-moderate income households in Lee’s Summit. Another area in high demand is the Lee’s Summit Housing Authority’s (LSHA) Section 8 Housing Choice Voucher Program.

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Introduction

Single-family residential housing accounts for a majority of the community housing stock. Multi-family rental units account for a small percentage of the community's housing stock. However, in recent years, multifamily development has picked up speed due to market demand. The number of multifamily housing units permitted for construction since 2015 increased dramatically. Newly permitted units continue to be in the higher price range.

Table 28 – Unit Size by Tenure, compares the number of 1 bedroom, 2 bedroom, and 3+ bedroom structures occupied by owners and renters. This shows that not only are the majority of inhabitants of Lee’s Summit owners, but 91% of those who own a home in Lee’s Summit own a home with 3+ bedrooms. Of those who rent in Lee’s Summit, most rent either a 2 bedroom (44%) or a 3+ bedroom (33%) structure.

Lee’s Summit is not built out yet. There are approximately 3,000 vacant preliminary platted lots that could be built on at any time, once final platted. It is anticipated that growth will primarily occur in these platted vacant lots in subdivisions that are not yet built out. It is also anticipated that there will be a good balance between owner and renter occupied units to be built during the next 5 years. Housing for seniors has been a hot market for a number of years and the trend is expected to continue with the aging population.

All residential properties by number of units

Property Type	Number	%
1-unit detached structure	26,705	74%
1-unit, attached structure	3,825	11%
2-4 units	2,225	6%
5-19 units	1,775	5%
20 or more units	1,425	4%
Mobile Home, boat, RV, van, etc.	15	0%
Total	35,970	100%

Table 27 – Residential Properties by Unit Number

	Owners		Renters	
	Number	%	Number	%
3 or more bedrooms	23,640	91%	2,650	33%
Total	25,930	100%	8,115	101%

Table 28 – Unit Size by Tenure

Data Source: 2011-2015 ACS

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

Two programs address (or specifically target) LMI and receive federal, state, and/or local funding: the Lee’s Summit Housing Authority (LSHA) and John Calvin Manor. The LSHA maintains two public housing developments, Lee Haven and Duncan Estates, which are for low income, elderly or disabled low-income persons. Lee Haven comprises 50 such housing units and Duncan Estates has 66, for a total of 116 units. John Calvin Manor receives federal assistance through Section 202. This agency maintains 100 housing units for the elderly and persons with disabilities.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

No affordable housing unit is anticipated to be lost in the community due to new development, redevelopment, or conversion.

Does the availability of housing units meet the needs of the population?

Recent statistics and analysis reveal that there is a mismatch between the availability of housing units in Lee’s Summit’s current market and the needs of our population, primarily in terms of price ranges and structure types. The Lee’s Summit Section 8 Housing Choice Vouchers program currently has 343 families on the waiting list (Note: LSHA is currently processing new vouchers for applicants on the waiting list). According to the City’s 2019 Analysis of Impediments to Fair Housing Choice, only the existing older housing is affordable for the low to moderate income households in Lee’s Summit. The median rent of Lee’s Summit is not affordable to a significant majority of renter households.

Describe the need for specific types of housing:

While the City’s existing housing stock provides a wide range of affordability for households of different income levels, newly constructed housing continues to be in the high price range. Lee’s Summit is also in need of more affordable rental housing, if the rents of current rental units remain high.

Discussion

MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

The cost of housing in the City has steadily increased for many years, as shown in Table 29 –Cost of Housing. According to the 2011-15 ACS estimates in Table 29, the median home value is \$191,300 and the median contract rent is \$808. The most recent 2013-2017 ACS five year estimates show that the median home value in Lee's Summit jumped to \$200,300 and the median gross rent was at \$1,025.

According to Table 31 – Housing Affordability, the majority of housing units do not become affordable until 80 - 100% of the HUD Adjusted Median Family Income (HAMFI). These categories correspond with HUD’s Income Limit categories where 30% is considered extremely low – very low income, 50% is considered very low – low income, and 80% is considered low – moderate income.

These tables also indicate that there are fewer families paying cheaper rents, and more families paying mid-to-high level rents.

Cost of Housing

	Base Year: 2009	Most Recent Year: 2015	% Change
Median Home Value	183,200	191,300	4%
Median Contract Rent	735	808	10%

High HOME Rent	0	0	0	0	0
Low HOME Rent	0	0	0	0	0

Table 32 – Monthly Rent

Data Source Comments:

Is there sufficient housing for households at all income levels?

Based upon the data presented here and the 2019 Analysis of Impediments to Fair Housing Choice, it does not appear that there is sufficient housing for those of extremely low to low income households. Lee's Summit Housing Authority's Section 8 Voucher Program continues to have a waiting list of several hundred applicants. Newly constructed homes in Lee's Summit are priced over \$300,000 and rental construction continues to be between market rent and luxury apartment range. Currently housing vacancy is extremely low making it an exceptionally tight market, especially for those who look for housing at a price they can afford.

How is affordability of housing likely to change considering changes to home values and/or rents?

Currently, the City's housing production continues to be driven by market demand. Based on the Developer Survey, local developers and builders are focusing on products that maximize their profit. So long as the market demand for high-priced housing continue to exist, new construction will likely produce more to meet that demand. Rental market is responding the same way. This trend is likely to continue.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

The HUD 2019 FMR for a two-bedroom rental unit in Jackson County is \$953. The 2013-2017 ACS reports that Lee's Summit's five-year estimated median gross rent is \$1,025. Though slightly higher, Lee's Summit gross median rent is comparable to Jackson County's FMR. Housing affordability will continue to

be a regional as well as local issue for some years to come. Preservation of existing affordable housing has a paramount importance for regional and local policies and sustainability. Lee's Summit Housing Authority adopted a strategic plan and strategic goals for increase in affordable housing units in the City in the near future and has been promoting its vision through multiple public events, including City Council presentations.

Discussion

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

According to Table 34—Year Unit Built, the majority of the owner-occupied housing in Lee’s Summit was constructed since 1980 (80%). Slightly more than a half of renter-occupied housing was built after 1980 (55%). Table 33 shows the number housing units by tenure that have one or more selected conditions. Selected conditions are similar to housing problems in the Needs Assessment and are (1) lacks complete plumbing facilities, (2) lacks complete kitchen facilities, (3) more than one person per room (overcrowding), and (4) cost burden greater than 30% of the total household income.

Table 35 – Risk of Lead-Based Paint Hazard tells a slightly different story about housing conditions. According to this table, while there is a greater percentage of renter-occupied housing built prior to 1980 than owner-occupied, a greater percentage of those units that are built prior to 1980 with children present is found in the owner-occupied and not the renter-occupied housing. It is worth noting that in the United States, lead-based paint has been banned since 1978, so the number and percentage of housing units built before 1980 as presented in this table would be higher than the number and percentage of units built before 1978. It should also be noted that lead-based paint hazard refers to paint that may contain lead and is deteriorating, including chipping and peeling. Buildings that have been well maintained, rehabilitated and frequently repainted would most likely not present any hazard.

A majority of owner-occupied housing units have no selected conditions (80%), whereas only 50% of the renter-occupied housing units have no selected conditions (see Table 33—Condition of Units).

According to Table 35 — Risk of Lead-Based Paint Hazard, 22% (5,638 units) of the owner-occupied housing stock and 45% (3,655 units) of the renter-occupied housing stock was built prior to 1980. Of these housing units, 18% (4,560) of the owner-occupied units and 45% (3,665) of the renter-occupied units were reported as having children present. While this table indicates the estimated number of units that may have Lead-Based Paint (LBP) Hazards, there is no data to indicate which of these units are occupied by low or moderate income families. The City’s Minor Home Repair (MHR) and First-Time Homebuyer (FTHB) Programs require LBP disclosure and inspections. The City has found very few instances of LBP hazard in our work through these programs. In addition, the City’s GIS records indicate that there are only about 7,900 total units built prior to 1980 (compared with Table 34’s total of 9,408); this number is reduced further to about 6,500 when looking at units built prior to 1978 (which is the commonly accepted date for LBP).

Definitions

The unit meets 2018 International Residential Code and the City's Code of Ordinances. All structures with substandard conditions can be habitable except if they are located in a flood plain or they are

non-conforming to the current code. Should the building be in a non-conforming situation, the rehab can be done if the rehab would bring the building up to current code.

Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
With one selected Condition	5,140	20%	3,730	46%
With two selected Conditions	45	0%	285	4%
With three selected Conditions	0	0%	35	0%
With four selected Conditions	0	0%	0	0%
No selected Conditions	20,750	80%	4,070	50%
Total	25,935	100%	8,120	100%

Need for Owner and Rental Rehabilitation

The City enforces local building codes and standards. Violations are required to be abated within a reasonable amount of time. Otherwise, The City relies on property owners to determine the need for rehabilitation.

Estimated Number of Housing Units Occupied by Low or Moderate Income Families with LBP Hazards

There is no specific data available. The City's Minor Home Repair program and First Time Homebuyer program provide CDBG funding for low-to-moderate income homeowners and homebuyers who are occupying or will occupy homes in the City. Over many years, both programs required visual inspections for LBP hazard if the building was built before 1978. Very few inspections came in confirming existence of lead hazard that requires further action for testing and abatement. However, these programs primarily focus on single family housing.

Discussion

Broadband and Resiliency Requirements

Beginning in 2017, HUD requires all Consolidated Plans submitted after January 1, 2018 to address Broadband and Hazardous Mitigation Resiliency. This rule amends HUD's Consolidated Plan regulations to require that local jurisdictions, to consider two additional concepts in con plan efforts. The first concept is how to address the need for broadband access for low and moderate-income residents in the communities they serve. The second concept added to the Con Plan process requires local jurisdictions to consider incorporating resilience to natural hazard risks, taking care to anticipate how risks will increase due to climate change, into development of the plan to begin addressing impacts of climate change on low- and moderate-income residents.

To comply with HUD's broadband and resiliency requirements, the City has incorporated actions into the con plan process:

- Low-moderate income residents were surveyed on their current needs regarding broadband accessibility and affordability

- Broadband internet service providers were contacted to develop a plan of increasing affordability to low-moderate income residents in the City

Lee's Summit residents have access to 12 residential internet providers and 96% of these have access to fiber service. As of 2019, Lee's Summit has an average download speed of 93.73 Mbps, which is 140.9% faster than the average speed in Missouri. The primary service providers in the City are AT&T, Spectrum and Google Fiber.

Survey Results:

- Nearly 80% or more of all respondents said their household had access to all of the following: desktop or laptop, smartphone, internet, cable or fiber, and Wi-Fi access
- The top broadband need was for more affordable internet/data services, which 35% of respondents had a need for
- Nearly 50% of respondents said they were satisfied with the affordability, performance, and speed of their broadband services

In partnership with the EveryoneOn program, all primary service providers in Lee's Summit provide low-cost internet and low-to-no-cost computer equipment to eligible participants. To qualify for these programs, individuals must meet one of the following:

- Low Income
- Live in Public Housing
- Participate in Free/Reduced Lunch Program
- Food Stamps

RESILIENCY

Hazard mitigation is any action taken to permanently eliminate or reduce the long-term risk to human life and property from natural and technological disasters. The City of Lee's Summit participated in a regional effort, led by the Mid America Regional Council (MARC) in 2015 to identify those hazards that pose the greatest risk to the local jurisdiction and where it is most vulnerable to loss of life or property. The goal of the plan is to reduce loss of life, property, human suffering, economic disruption and disaster assistance costs from natural and man-made disasters.

MA-25 Public and Assisted Housing – 91.210(b)

Introduction

The Lee's Summit Housing Authority has two developments; Duncan Estates and Lee Haven Apartments. These developments comprise a total of 116 dwelling units. The Duncan Estates property is comprised of 66 residential dwelling units of which 55 are one bedroom and 11 are two bedroom units. There are 50 residential dwelling units in Lee Haven Apartments, of which there are 42 one bedroom and 8 two bedroom units.

The LSHA also administrates a Section 8 Housing Choice Voucher (HCV) Program for residents of Lee's Summit and Greater Jackson County. The program currently stands at a base-line of 649 vouchers.

Totals Number of Units

	Program Type								
	Certificate	Mod-Rehab	Public Housing	Vouchers

Data Source: PIC (PIH Information Center)

Describe the supply of public housing developments:

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan:

The Lee's Summit Housing Authority (LSHA) has a total of 116 dwelling units in two housing developments (Duncan Estates and Lee Haven Apartments). Overall, both developments are in fair condition and well maintained. Through its 5-Year Plan (6/1/2017 through 09/30/2021) the LSHA has implemented several capital improvements. LSHA has completed a thorough rehabilitation of half of the bathrooms at Duncan Estates. The other half will undergo rehabilitation in 2020. LSHA has replaced nearly all the stove/ovens and refrigerators in all 116 units. Other projects underway or completed are repairs to twelve LSHA-owned streetlights at both properties, as well as needed security upgrades to all LSHA buildings.

The LSHA has identified several long-range capital needs as a result of its planning. HUD provides Capital Funds annually to Public Housing Agencies (PHAs) for the development, financing, and modernization of public housing developments and for management improvements. Due to continued funding cuts from Congress, HUD has instituted reductions in the Capital Fund each year for the last several years. This continued level of under-funding represents approximately half of what LSHA accrues annually for physical improvements, resulting in a backlog of capital needs. So far, the LSHA has been able to maintain its properties through effective management coupled with efficient and prudent expenditure of limited resources.

The LSHA has identified several major systems that will need replacement and rehabilitation in the next five years, and must also carefully evaluate the overall condition and continued long term viability of its Lee Haven property. Lee Haven was constructed in 1967 and is now 50 years old. While the units at Lee Haven are in good repair, their age and the overall condition of site improvements will have a direct impact on the expenditure of capital funds and on long range planning. A complete rehabilitation of the property may be necessary, and LSHA plans to complete a new Physical Needs Assessment in 2020-2021 in order to plan the next chapter of this property.

In addition to the needs of existing properties, the Lee's Summit Housing Authority's current 5-Year Strategic Plan and accompanying Affordable Housing Needs Assessment identified a critical need for new affordable housing options in this city. LSHA maintains waiting lists for the Section 8 Housing Choice Voucher program and Public Housing program, with typical wait times of 4-5 years from application to voucher issuance or offer of a unit. These planning studies also show a need for at least 100 units of new affordable housing within the next 3 years, and 400 new units of affordable housing by 2027. At present, few other private or public organizations are working to meet these needs in Lee's Summit. In October 2019 LSHA hired a full-time Development Specialist to assist the Executive Director in planning how the agency might help meet these needs by leveraging new HUD programs with other affordable housing funding sources, including Low Income Housing Tax Credits and private grants, to build new affordable housing projects in the city.

The LSHA has a total of 9 units that are "Accessible Units" of which 6 units are fully accessible. The LSHA incorporates accessible designs in renovation and rehabilitation projects that are planned at both Duncan Estates and Lee Haven Apartments. The LSHA complies with the guidelines of providing reasonable accommodations as established by HUD and the Office of Fair Housing.

Public Housing Condition

Public Housing Development	Average Inspection Score

Table 38 - Public Housing Condition

Describe the restoration and revitalization needs of public housing units in the jurisdiction:

The LSHA has identified several long range capital needs as a result of its planning. HUD provides Capital Funds annually to Public Housing Agencies (PHAs) for the development, financing, and modernization of public housing developments and for management improvements. So far, the LSHA has been able to maintain its properties through effective management coupled with efficient and prudent expenditure of limited resources.

The LSHA has identified several major systems that will need replacement and rehabilitation in the next five years, as discussed above.

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing:

The LSHA's mission is to fulfill the need for decent, safe and affordable housing for very low to moderate income seniors and families, to provide a quality living environment for seniors where they can live independently in their own homes, to facilitate partnerships between landlords and families for affordable rental housing opportunities, and to provide a people oriented organization that encourages and supports the citizens it serves and is a valuable asset to the community. In carrying out this mission, the agency will use its limited resources effectively and efficiently to produce the desired results. Prudent and responsible program administration will only achieve a limited success. The LSHA will need the support and cooperation of other community partners to create overarching strategies that are designed to make a difference in the quality of lives of families in the community.

Discussion:

MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

Lee’s Summit has a limited supply of beds for homeless individuals through local public services agencies such as Hillcrest Transitional Housing and Hope House. Homeless services and facilities are largely provided by the Greater Kansas City Coalition to End Homelessness, the HUD regional Continuum of Care, which covers Jackson County, Missouri and Wyandotte County, Kansas. According to GKCCEH's 2017 Annual Report, "The PIT count for the GKCCEH service area dropped from 2,193 adults and children in 2014 to 1,671 in 2017, a decrease of 23.8%." "On November 20, 2017, the U.S. Interagency Council on Homelessness officially recognized Kansas City as the first community in Missouri and Kansas to effectively end veteran homelessness." However, "the number of children in Emergency Shelters rose from 81 in 2014 to 209 in 2017."

Facilities and Housing Targeted to Homeless Households

	Emergency Shelter Beds		Transitional Housing Beds	Permanent Supportive Housing Beds	
	Year Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	0	0	0	0	0
Households with Only Adults	0	0	0	0	0
Chronically Homeless Households	0	0	0	0	0
Veterans	0	0	0	0	0
Unaccompanied Youth	0	0	0	0	0

Table 39 - Facilities and Housing Targeted to Homeless Households

Data Source Comments:

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons

Lee's Summit is in the service area of the Greater Kansas City CoC, the Greater Kansas City Coalition to End Homelessness. In addition, Lee's Summit area has several agencies and programs to meet the needs of the community for health, mental health and employment services and shelters. Some of these programs include:

- Mental Health/Substance Abuse: ReDiscover, Hillcrest Transitional Housing, and Hope House offer a wide range of services in Lee's Summit that both serve families and individuals with mental health needs, women and children seeking to escape from domestic violence and persons who are homeless. These organizations offer counseling services to individuals seeking emergency shelters, mental health counseling, transitional housing and life-skill training.
- Health: Services in Lee's Summit that focus on the health of homeless individuals or those at risk of homelessness largely consist of programs centered on the basic need for food and clothing. Lee's Summit Social Services and Coldwater in particular offer emergency food assistance.
- Employment: There are several services in Lee's Summit that work to improve the employment opportunities of individuals. One specifically targeting veterans, including those categorized as homeless, is Green Vet which trains veterans in 'Green Collar' careers like deconstruction and efficient energy construction. Other agencies, like the Adult Continuing Education for Persons with Developmental Disabilities works to provide disabled individuals with non-credit courses designed to improve education and socialization. Serving the larger region, the Goodwill of western Missouri and Eastern Kansas has programs that offer employment services for persons with disabilities and other disadvantages.

The United Way 2-1-1 of Greater Kansas City "is a free, confidential, nationally accredited information and referral service available 24 hours a day. By dialing 2-1-1, a single call connects people in the community with trained call specialists who will guide them to find resources for their specific situation." according to the City of Lee's Summit Human Services Advisory Board.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

No applicable.

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

Persons with special needs include seniors, persons with disabilities, victims of domestic violence, victims of abuse, persons with health issues, persons with mental health issues, persons of low income, homeless persons, persons with substance abuse issues, etc. These needs vary in terms of the types of supportive services needed and convenience for access. Lee's Summit is a suburban community in the Greater Kansas City metro area and is served by local agencies and programs as well as regional ones. Social services, public housing, assisted housing, health services, transitional housing, emergency shelters, mental health services, and employment services all have local presence and regional service coverage. Persons with special needs call locate services that meet their needs by contacting the United Way 2-1-1 system, or other service providers for consultation or referrals. Hope House, ReDiscover, Hillcrest Transitional Housing, Lee's Summit Social Services, Developing Potential, Lee's Summit Cares, Community Services League, Child Abuse Prevention Association, and other charity organizations and faith-based organizations offer various programs in and around Lee's Summit.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Lee's Summit has been experiencing an increase in the construction of senior housing and supportive services in recent years. Independent living and assisted living facilities are being constructed to meet the increasing need of the aging population. Local and regional hospitals, specialty services, and other public services provide variety of opportunities to meet different needs.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

No information.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

Continue to work with local agencies providing services to persons with special needs to identify new opportunities and collaboration.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

Continue to identify the level of need and opportunities for service improvements.

MA-40 Barriers to Affordable Housing – 91.210(e)

Negative Effects of Public Policies on Affordable Housing and Residential Investment

The City conducted a comprehensive Analysis of Impediments to Fair Housing Choice in 2018 and 2019. The Analysis revealed no local public policy in place that would hinder affordable housing and residential investment. The Analysis examined local policies, regulations, development standards, processes, procedures and programs and found no obvious evidence of negative effect. Yet, the study identified barriers to fair housing choice that need to be addressed. Fair housing is a significantly broader issue than affordable housing. Affordable housing focuses on affordability of housing based on household income. Fair housing focuses on fair access and equal opportunities for housing, services, education, employment, recreation, community assets, etc. The identified barriers to fair housing choice are not all related to housing nor housing affordability. Furthermore, there is no evidence that these identified barriers are a direct result of public policies.

MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

Lee's Summit is a suburban community of the Kansas City Metropolitan area within a large regional economy. As such, the community is not isolated and independent in terms of economic development, labor pool, employment, education opportunities, etc. People have more choices in such a larger economy and local economic health is largely dependent upon the overall economic health of the region. Recent demographic statistics continue to indicate that more Lee's Summit workers travel to work outside the city limits than workers from outside Lee's Summit travel to work in Lee's Summit. This pattern is not likely to change any time soon. Commuting between home and work is a very important aspect of community wellbeing.

According to the 2011-2015 ACS statistics presented in the tables in this section, this community has the largest number of workers working in education and health care service industries, professional, scientific and management services and retail businesses. Other assets are a strong labor force with a low unemployment rate, fairly short commute times, and a highly-educated workforce. The job market is very competitive and some individuals must find work outside of Lee's Summit; however, due to the location of the City in a bigger metropolitan economy, the number of jobs and the number of workers are better balanced, given the availability of either in close proximity to fill the gaps.

Economic Development Market Analysis

Graduate or professional degree	184,405

Table 46 – Median Earnings in the Past 12 Months

Data Source: 2011-2015 ACS

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

The sectors with the most jobs are Education and Health Care Services (7,463), Retail Trade (5,780), and Arts, Entertainment, Accommodations (5,002). The sectors with the greatest number of workers are

Education and Health Care Services (7,326), Professional, Scientific, Management Services (5,919) and Retail Trade (5,124). This indicates that Lee's Summit has strong service industries and education, and a growing retail base.

Describe the workforce and infrastructure needs of the business community:

The 2011-2015 ACS data suggests that Lee's Summit has more workers (38,567) than jobs (31,369) in the overall economy. However, it is important to point out that Lee's Summit is a part of a larger metropolitan economy where job market and labor pool are more dynamic. Workers commute to work across city limits and jobs are available for workers across borders. Data provides valuable information as to where there is room for opportunities and improvements. During the public participation process, several concerns were raised regarding workers and employment, including lack of convenient public transportation connecting workers to jobs and lack of affordable job training to match job skills to employment opportunities. Availability of affordable housing close to employment can be a barrier as well.

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

The City's 2019 Strategic Plan, "Lee's Summit Ignite", established seven critical success factors, the first one being "Strategic Economic Development", that builds an adaptable framework for continued growth in a changing environment. The City adopted an Incentive Policy in 2015 to promote economic growth in Lee's Summit and it will continue to have an impact on the economic wellbeing of the community. The City is implementing multiple public infrastructure improvement plans as a result of its Thoroughfare Master Plan and CIP to ensure proper maintenance of existing public infrastructure and expansion of existing systems to meet the needs of new growth.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

According to the statistic provided in Table 40—Business Activity, it appears that the top business sector (Education and Health Care Services) is fairly evenly matched with the number of workers and the number of jobs. Retail Trade is similar. Professional, Scientific, Management Services sector shows significantly more workers than availability of local jobs. Most of the other sectors, primarily labor intensive sectors, see more workers than jobs.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

The Kansas City metropolitan area offers a wide range of opportunities for job training through community colleges, universities, vocational schools and other public and private programs. Locally, Lee's Summit is served by University of Central Missouri Lee's Summit Campus, Longview Community College, and Missouri Innovation Campus programs. They provide opportunities for local and regional residents to be well prepared for careers of their choice or advance to a different level of their current career.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

No.

Discussion

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

There is no specific and relevant data to suggest any obvious concentrations of households with multiple housing problems. The majority of housing stock has been built in recent decades under stricter building codes and property maintenance codes. Older housing units are more likely to have multiple housing problems, especially if they are occupied by households of lower income.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

There is no sign of significant minority or low-income concentration in Lee's Summit on a large scale. When the 2019 Analysis of Impediments to Fair Housing Choice was conducted, HUD CPD's AFFH Mapping data was examined to identify any concentration. Data suggest that minority and ethnic population is relatively evenly distributed in the City with minor variations in percentages. Older homes in Lee's Summit built before the 1980's are generally of lower appraised value, which are primarily located around City's old town area. HUD defines LMI areas as those with 51% or more LMI households within the geographic area.

What are the characteristics of the market in these areas/neighborhoods?

The area identified above surrounds the downtown commercial district that has been thriving with a wide variety of retail and service activities, however, most of the businesses in the CBD are specialty retailers that tend to be beyond the buying power of the residents living around the area. Conventional retailers and services are located in convenient distances outside downtown for these residents and the market is generally healthy with no sign of slowing down or sliding downward.

Are there any community assets in these areas/neighborhoods?

The area has downtown businesses and services, City offices and services, neighborhood and community parks, schools, churches, a variety of housing choices, community centers and employment opportunities. Public investments in infrastructure improvements have been greater in the area than in the past, with multiple parks, streets, sidewalks, sewer and stormwater improvements completed in recent years. The area is also in close proximity to other community assets.

Are there other strategic opportunities in any of these areas?

These areas also contain pockets of vacant or underutilized properties that are opportunities for redevelopment and in-fill development. In recent years, some redevelopments have occurred and new ones are in planning and approval process. Residential development is a part of this renewed interest in

downtown growth. The City has been, and will continue to be attracting more economic growth and housing development in and around the downtown area. Downtown Lee's Summit has been recognized both at the state and national levels as the America's Great Neighborhoods. These recognitions will certainly impact the area in a positive way.

Strategic Plan

SP-05 Overview

Strategic Plan Overview

The Strategic Plan presents the priority needs and goals determined through a comprehensive strategic planning process. The community's priority needs in housing, public improvements and public services are highlighted, describing where and how the City may focus community resources.

Additionally, the Strategic Plan addresses the City's strategy for reducing lead-based paint hazards in housing. The anticipated resources and allocation of funding demonstrates the City's strategic approach to accomplishing its goals.

The City's homelessness and anti-poverty strategies are presented along with the Lee's Summit Housing Authority's Strategic Plan. Findings from the City's 2019 Analysis of Impediments to Fair Housing Choice will be used to present the identified barriers to fair housing choice in Lee's Summit along with the report's recommendations to remove these barriers.

SP-10 Geographic Priorities – 91.215 (a)(1)

Identify the needs in this target area.	
What are the opportunities for improvement in this target area?	
Are there barriers to improvement in this target area?	

General Allocation Priorities

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA)

The intent of the CDBG program is to meet the needs of the low-to-moderate income persons and address slums or blight. In order to focus attention on the target population groups, the geographic areas that have a higher percentage of LMI residents are important to analyze.

HUD designates those areas that have a LMI population of 51% or more as LMI areas in which area wide efforts can be funded through the CDBG program, or areas of low income concentrations. When analyzing the City in terms of the low to moderate income population, according to the most recent census data provided by HUD, there are five census block groups in Lee’s Summit that have a population of 51% or more considered LMI. All of these block groups are in and around the old town area including downtown. Although Lee’s Summit has a higher median income than the metropolitan area, Jackson County and the State of Missouri, there are a substantial number of low-to-moderate income (LMI) households within the City.

Additionally, although a relatively small percent of the individuals in Lee’s Summit are below the poverty level, higher percentages of elderly and female headed households are below the poverty level.

Although geographic concentration has been considered, in general terms the high priority needs identified through the strategic planning process are community wide with no clear geographic focus. Certain needs are greater in some areas than others. Older areas tend to have more gaps or deteriorated conditions in their sidewalk system. Public service needs of low-to-moderate income residents also tend to be higher in older neighborhoods.

Funding allocation for public service priorities will continue to be primarily based on household income, not location-specific necessity. The 2019 AI consultation process confirms that the public investment decisions for (City controlled) infrastructure improvements have based on need and urgency rather than geography.

SP-25 Priority Needs - 91.215(a)(2)

Priority Needs

Table 48 – Priority Needs Summary

1	Priority Need Name	Mental Health/Substance Abuse Assistance
	Priority Level	High
	Population	Extremely Low Low Moderate Families with Children Elderly Individuals Families with Children Mentally Ill Chronic Substance Abuse veterans Victims of Domestic Violence Unaccompanied Youth Persons with Alcohol or Other Addictions Victims of Domestic Violence
	Geographic Areas Affected	Communitywide
	Associated Goals	Mental Health/Substance Abuse Counseling Transportation for Special Needs
	Description	Provide support (funding) to local agencies that provide mental health/substance abuse services and emergency shelter and counseling services for victims of domestic violence. These programs are continuing programs under the Community Development Block Grant program that have made significant impact in improving the quality of life of low to moderate income individuals dependent upon assistance that is otherwise not available to them.
	Basis for Relative Priority	Mental illness and substance abuse affect the quality of life of the persons having these issues as well as others. Often times the results are fatal. In addition, people with these issues tend to be in financial disadvantage. Public service agencies locally have been providing services to these individuals for many years and the service gap still exist. The 2019 Strategic Plan of the City includes seven Critical Success Factors for the future of the community and one critical success factor recognizes the importance of community health and well being.

2	Priority Need Name	Basic Needs of Low-to-Moderate Income Persons
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Elderly Chronic Homelessness Individuals Families with Children veterans Elderly Frail Elderly
	Geographic Areas Affected	Communitywide
	Associated Goals	Transportation for Special Needs
	Description	Support local public services that meet the basic needs of residents for food, clothing, health services, living expenses. Without such assistance, these individuals may not have the basic necessities for survival.
	Basis for Relative Priority	Human survival is the most important of all. Agencies and services providing assistance to those who, without the assistance, may be in danger of becoming homeless or going hungry.
	3	Priority Need Name
Priority Level		High
Population		Extremely Low Low Moderate Large Families Families with Children Elderly Public Housing Residents

	Geographic Areas Affected	Old Town Area Communitywide
	Associated Goals	Residential Rehab and Affordable Housing
	Description	Promote, coordinate and assist in the residential rehabilitation programs benefiting low-to-moderate income homeowners and public housing. Work towards increase in number of affordable housing units in the City.
	Basis for Relative Priority	The importance of housing and housing affordability needs is reinforced by the City's 2019 Analysis of Impediments to Fair Housing Choice, the 2019 Ignite Strategic Plan and the Consolidated Plan public consultation. Rehabilitation of existing housing makes more affordable housing units available to low income households and in decent condition. Improved housing helps remove blighted conditions, stabilize the neighborhood and add to the value of the community well being.
4	Priority Need Name	Sidewalk Improvement in Older Neighborhoods
	Priority Level	Low
	Population	Extremely Low Low Moderate Middle Families with Children Elderly Individuals Elderly
	Geographic Areas Affected	Old Town Area
	Associated Goals	Transportation for Special Needs
	Description	Even though the City has implemented a sidewalk improvement plan since 2010, the improvements have been heavily dependent upon funding availability through non-CDBG resources. Gaps in the existing sidewalk systems across the City still exist. Due to age and special circumstances, older neighborhoods tend to have more gaps to be filled. Sidewalks are becoming increasingly important in recent effort to push for healthy lifestyle and multimodal transportation.

	Basis for Relative Priority	Gaps, deterioration, continuing maintenance of the City's sidewalk system have been recognized by the City as a major public facility improvement need. A sidewalk improvement program as a result of a comprehensive sidewalk needs study has been providing some relief in the system, however, due to extremely limited resources, a lot more needs to be done. The City has a program to address the issue pending additional funding. It will be a long term effort with slow progress anticipated.
5	Priority Need Name	Transportation for Persons with Special Needs
	Priority Level	Low
	Population	Extremely Low Low Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Victims of Domestic Violence
	Geographic Areas Affected	Communitywide
	Associated Goals	Transportation for Special Needs
	Description	During public consultation, a common issue was raised across several public service agencies that it has become more and more frequent that the people they serve or seeking services to meet their needs do not have transportation available to them. Majority of these individuals do not have private and personal transportation of their own.
	Basis for Relative Priority	Compared with other high priority needs, this need affects less people and occurs less frequently and the solution may be more complicated and requires long term strategy and interagency cooperation and coordination.
6	Priority Need Name	Planning and Administration of the CDBG Program
	Priority Level	High
	Population	Other
	Geographic Areas Affected	

	Associated Goals	
	Description	Activities related to developing the fair housing choice analysis, consolidated planning, preparing action plans and administering the CDBG program.
	Basis for Relative Priority	CDBG program provides opportunities and funding to support community effort to address needs identified through the consolidated planning process. Administration of the program to meet all Federal, State and local regulations and procedures is critical for the effectiveness of the program.
7	Priority Need Name	Improved Public Information
	Priority Level	Low
	Population	Other
	Geographic Areas Affected	Communitywide
	Associated Goals	Improved Availability of Public Information
	Description	Efforts to make more information available to the public on the community needs, services available, resources for assistance, etc. and improve accessibility of such information.
	Basis for Relative Priority	Compared to the other priority needs, this one is low. However, it may be easier to accomplish than the other priority needs and requires a lot less resources.

Narrative (Optional)

In the process of establishing the priority needs of the community for the next five years, several key factors were taken into consideration, including, but not limited to, achievability given the known community resources, complexity of the issue that requires more studies prior to any action planning taking place, the value of existing supported programs to the community's wellbeing, particularly the population of low income or of special needs, and the community goals established by the community strategic plan process. In addition, the Consolidated Plan places more focus on the priority needs that can be addressed using the CDBG annual grant funds. Other priority needs, such as street improvements, curb replacement, sidewalk improvement outside low income areas, storm drainage improvements, street lighting for increased safety, will be addressed outside the CDBG program.

SP-30 Influence of Market Conditions – 91.215 (b)

Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	Currently, tenant based rental assistance is provided through several public assisted housing establishments in Lee's Summit, such as Lee's Summit Housing Authority. Need has been greater than what can be provided, for example, LSHA maintains a waiting list for applicants for Housing Choice Vouchers at any given time.
TBRA for Non-Homeless Special Needs	
New Unit Production	Currently and in the near future, market rate housing production will continue to dominate the residential development landscape. Lee's Summit Housing Authority's Strategic Plan calls for collaborative effort to produce some additional housing units affordable for households of low income.
Rehabilitation	Older homes, particularly affordable homes, which make up a good portion of the community's housing stock need ongoing upkeep and renovation in order to maintain a good supply of affordable and sustainable homes for LMI residents.
Acquisition, including preservation	There is a need for affordable housing. Preservation of existing affordable housing stock has been the community's priority for many decades. Through the City's Minor Home Repair program, CDBG funds have been utilized for over twenty years to help low to moderate income homeowners to complete needed repairs. New construction of affordable housing is also needed. Currently new housing has been in the mid to high price ranges.

Table 49 – Influence of Market Conditions

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

The Community Development Block Grant is the only known resource to be available to the City of Lee's Summit from various federal resources to address the identified community needs. Local agencies will have opportunities to apply for the ESG grant through the State of Missouri. Public housing needs may also be met with other HUD grants to be awarded to the Lee's Summit Housing Authority. Local agencies will continue to make efforts and explore new funding sources for their programs to meet client needs.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	350,000	0	1,000	351,000	0	Expected CDBG fund allocation from HUD for Program Year 2020-2021, plus unused funds from prior year activities. No program income is expected.
General Fund	public - local	Admin and Planning	60,000	0	0	60,000	0	Staff administering the CDBG program will be partially funded with CDBG grant, not exceeding the allowable 20% of the CDBG annual grant amount. The remainder of staff time cost will be covered with the City's general fund.

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
Public Housing Capital Fund	public - federal	Housing	153,000	0	0	153,000	0	Lee's Summit Housing Authority anticipates that HUD public housing capital improvement fund to the agency will be the same amount as last year's.

Table 50 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

The CDBG funding will leverage other resources for most of the services and programs that the CDBG program assists. For CDBG administration, the City will cover a portion of the administrative cost with its general fund. Lee's Summit Housing Authority projects leverage other federal funds for capital expenses. Other subrecipients combine CDBG allocations with a variety of resources, including in-kind donations, local grants, local churches, local charities, private foundations, private fundraising, State funding resources, etc. The City will not require funding match for any of the CDBG funded programs and projects.

If appropriate, describe publically owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

N/A

Discussion

SP-40 Institutional Delivery Structure – 91.215(k)

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Responsible Entity	Responsible Entity Type	Role	Geographic Area Served
LEE'S SUMMIT HOUSING AUTHORITY	PHA	Public Housing	Jurisdiction
LEE'S SUMMIT SOCIAL SERVICES	Subrecipient	public services	Jurisdiction
Coldwater of Lee's Summit	Subrecipient	public services	Jurisdiction
HOPE HOUSE	Subrecipient	public services	Region
REDISCOVER MENTAL HEALTH	Subrecipient	public services	Jurisdiction
Hillcrest Ministries of MidAmerica, Inc.	Subrecipient	Homelessness public services	Jurisdiction
City of Lee's Summit Public Works Department	Departments and agencies	public facilities	Jurisdiction

Table 51 - Institutional Delivery Structure

Assess of Strengths and Gaps in the Institutional Delivery System

All the agencies and organizations have been in operation providing services of their specialties for many years in the region or in the community. Most of the agencies have been beneficiaries of the CDBG program and have been working closely with the City in planning and implementation of local programs to address local needs. However, most of the participating agencies work under limited resources and rely on CDBG to maintain the level of service they have been providing. Limited resources limit their abilities to keep up with the needs.

Table 52 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

The majority of the local programs included in this plan do not have a focus on services targeting homeless population and/or persons with HIV. They are primarily services based on local needs of LMI persons, families and persons with special needs. Homeless needs are largely addressed through the Greater Kansas City Coalition to End Homelessness, the region's Continuum of Care and other state and regional programs.

Local programs range from basic needs, such as food, clothing, housing, rents, medicine, school supplies, to special needs, such as mental health counseling, developmental disability assistance, and shelter and assistance for victims of domestic violence. However, some of these services are not able to meet all the needs of the community. Limited funding sources also limit their service capabilities.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

Availability of public information regarding the types of services and locations was identified during the AI and Con Plan public participation as a weak line. Transportation for special needs population who do not have a reliable personal transportation was also identified as a gap between persons in need of service and the service. Shortage of funding certainly creates service gaps as well.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

The City will continue to work closely with local and regional stakeholders and partners in its planning effort to address priority community needs and to identify and leverage all possible resources. In the meantime, the City will take advantage of the 2019 Strategic Plan established community aspirations for improving the quality of life of its citizens through cooperation and collaboration.

SP-45 Goals Summary – 91.215(a)(4)

Goals Summary Information

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Residential Rehab and Affordable Housing	2020	2024	Affordable Housing Public Housing	Old Town Area Communitywide	Residential Rehabilitation and Affordable Housing	CDBG: \$230,000 General Fund: \$0 Public Housing Capital Fund: \$15,300	Rental units rehabilitated: 20 Household Housing Unit Homeowner Housing Rehabilitated: 15 Household Housing Unit
2	Basic Needs for Food, Clothing, etc.	2020	2024	Homeless Non-Homeless Special Needs	Communitywide			Public service activities other than Low/Moderate Income Housing Benefit: 100 Persons Assisted
3	Mental Health/Substance Abuse Counseling	2020	2024	Non-Homeless Special Needs	Communitywide	Mental Health/Substance Abuse Assistance	General Fund: \$0 Public Housing Capital Fund: \$0	

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
4	Transportation for Special Needs	2021	2024	Non-Homeless Special Needs	Communitywide	Mental Health/Substance Abuse Assistance Basic Needs of Low-to-Moderate Income Persons Sidewalk Improvement in Older Neighborhoods Transportation for Persons with Special Needs		
5	Improved Availability of Public Information	2020	2024	Public information	Communitywide	Improved Public Information		Other: 1 Other

Table 53 – Goals Summary

Goal Descriptions

1	Goal Name	Residential Rehab and Affordable Housing
	Goal Description	Provide CDBG assistance to low-to-moderate income homeowners for urgent and critical repairs to ensure decent living conditions. Support Lee's Summit Housing Authority in its continuing maintenance of the existing public housing structures
2	Goal Name	Basic Needs for Food, Clothing, etc.
	Goal Description	Provide CDBG assistance to local programs that meet the needs of the homeless, low-to-moderate income persons, children, and persons with disabilities for food, clothing and other essentials for survival.

3	Goal Name	Mental Health/Substance Abuse Counseling
	Goal Description	Continue to support local agencies and programs for mental health and substance abuse counseling.
4	Goal Name	Transportation for Special Needs
	Goal Description	People with special needs who cannot afford or don't have reliable personal transportation face challenges of not being able to receive services they need. Local public service agencies serving these clients often times are not able to serve or make a referral for services elsewhere due to transportation issues. Focus Group on Public Services raised this issue as their major concern as they try to improve their services to these clients.
5	Goal Name	Improved Availability of Public Information
	Goal Description	Through the City's AI and Consolidated Plan public consultation, there was a call for making more information available to the public on fair housing, affordable housing, public services, legal assistance, job training opportunities, alternative transportation, etc. This effort will improve public awareness and access to information, particularly for those with special needs.

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

The City of Lee's Summit will not provide CDBG funding for construction of new housing for LMI families. However, through various local programs, some of which will receive CDBG support, existing housing of LMI families and households will benefit from the CDBG program and other resources. The Lee's Summit Housing Authority operates a total of 116 units, which will benefit from the CDBG program as well as other federal funding. According to Lee's Summit Housing Authority's Strategic Plan goals, some additional housing units will be constructed during the next few years. The Minor Home Repair program will assist low/moderate income homeowners for needed repairs. Hillcrest Transitional Housing operates 16 transitional housing units in the City to benefit LMI and homeless families.

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

Not applicable.

Activities to Increase Resident Involvements

The LSHA works in cooperation with its “residents” in the development of policy and management of the program. Residents participate in the planning process involved with the 5-Year Strategic Plan and Annual Plans. Policy changes and projects that have a direct or indirect impact on residents are discussed at resident meetings. At “pot-luck” dinners each month, LSHA staff members and residents meet to discuss “issues” and develop strategies. LSHA publishes a newsletter which is distributed to residents monthly. The newsletter contains information regarding administration of the housing authority; including implementation of policy changes as promulgated by HUD or discretionary changes by LSHA. The LSHA takes an “open-door” approach to hearing ideas and concerns raised by residents.

Is the public housing agency designated as troubled under 24 CFR part 902?

No

Plan to remove the ‘troubled’ designation

Not applicable.

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

The City conducted a comprehensive Analysis of Impediments to Fair Housing Choice in 2018 and 2019. The Analysis revealed no local public policy in place that would hinder affordable housing and residential investment. The Analysis examined local policies, regulations, development standards, processes, procedures and programs and found no obvious evidence of negative effect. Yet, the study identified barriers to fair housing choice that need to be addressed. Fair housing is a significantly broader issue than affordable housing. Affordable housing focuses on affordability of housing based on household income. Fair housing focuses on fair access and equal opportunities for housing, services, education, employment, recreation, community assets, etc. The identified barriers to fair housing choice are not all related to housing nor housing affordability. Furthermore, there is no evidence that these identified barriers are a direct result of public policies.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

The 2019 AI proposes several strategies to address identified barriers to affordable housing. These strategies take into consideration the need to maintain existing affordable housing stock and promote supply of additional affordable housing to meet the needs of households of all income levels. The City will continue to provide financial assistance to homeowners for needed home repairs to improve their living conditions and assistance to support local public housing authority and transitional housing agency. The City has started and will continue to re-evaluate its current zoning regulations and maintenance code to encourage inclusionary residential development. The City will actively participate in regional strategies for affordability. Efforts will be made to improve availability and access of public information on fair housing and affordable housing.

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

Lee's Summit is in the service area of the regional Continuum of Care, the Greater Kansas City Coalition to End Homelessness. According to its most recent annual report, the GKCCEH started implementing its Coordinated Entry (CE) system in 2017 with five Community Hubs across Jackson and Wyandotte Counties where families and individuals experiencing a housing crisis can be screened for housing service needs. This improved the Coalition's ability to more efficiently track homeless persons and pair them with housing and services.

Local public service agencies, including Hope Housing and ReDiscover, are participating in the Coalition to provide services and connection between people in housing crisis and housing and services.

Addressing the emergency and transitional housing needs of homeless persons

The City's strategy for addressing the emergency and transitional housing needs of people who are homeless or at risk of homelessness includes sustained funding that maintains existing shelters and services, through the allocation of Community Development Block Grant resources to local entities that leverage further resources for that purpose. This includes funds Hillcrest Transitional Housing, Hope House, ReDiscover, and the Lee's Summit Housing Authority. Coordination among different agencies and service providers to assist the homeless and prevent homelessness is the function of the regional CoC.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

The City's strategy for helping people who are homeless, particularly the chronically homeless, transition to stable housing and independent living focuses on better coordination with the Greater Kansas City CoC participating agencies. Financial support through the CDBG program will be made available to maintain the level of appropriate supportive services and the number of units of permanent supportive housing provided by local agencies.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving

assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

Prevention initiatives play a central role in short and long term strategies to help low-income individuals and families avoid becoming homeless. Local agencies such as Hillcrest Transitional Housing and Hope House that provide housing assistance and emergency shelters have already built into their programs homeless prevention counseling for the people and families they serve.

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The City does not have specific data regarding the extent of lead-based paint hazard existing in residential units. As the City was conducting its 2019 Analysis of Impediments to Fair Housing Choice, data from the Missouri EPHT Blood Lead Report (ages 0-5): 2013-2017 provided by the Missouri Department of Health and Senior Services indicated that Jackson County was among the lowest percentage of persons tested who had elevated lead levels in their blood. However, the data does not specify the number of local cases.

The City's primary goal is to make all efforts to educate homeowners, renters and landlords regarding the danger of lead-based paint hazard. The City is already enforcing policies under its Minor Home Repair Program where contractors working on residential rehabilitation projects are required to be properly licensed to perform Safe Work Practices to prevent lead-based paint hazards from further contamination and becoming dangers to residents. The CDBG-funded First Time Homebuyer program enforces federally mandated environmental review requirements, including lead based paint inspections. The City will continue to provide educational information regarding lead-based paint hazards to homeowners and home buyers through these programs.

How are the actions listed above related to the extent of lead poisoning and hazards?

The City will continue to implement the following strategies to address lead-based paint hazards.

- Continue public awareness and education campaign
- Continue consultation with the State and County health departments on lead-poisoning cases and prevention efforts
- Continue to conduct lead-based paint inspections, if applicable, on housing structures to be purchased through the First Time Homebuyer program before funds are committed
- Enforce EPA mandates pertaining to the proper licensing of contractors/remodelers performing home repairs in Lee's Summit
- Enforce the Safe Work Practices regulations by closely monitoring work procedures on site of construction
- Obtain proper training and certification for staff, as needed

There is no evidence of serious lead poisoning and existence of hazards. However, the City will continue with the practices already in place.

How are the actions listed above integrated into housing policies and procedures?

The City's Development Services Department has the responsibility of educating the community about the hazards presented by lead-based paint. Additionally the First-time Homebuyer and Minor Home

Repair Programs, both funded by the CDBG program, actively seek to identify homes where the risk of lead hazard may be present. To qualify as a first time homebuyer, any home built before 1978 must pass a deteriorated paint inspection. Any failed inspection mandates the application of HUD regulations regarding the abatement of lead-based paint prior to the dispensation of the grants associated with the program. For any Minor Home Repair Program project, Lead Safe Work Practices are required to be utilized by all certified contractors.

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

The City will continue to utilize CDBG program funds to help leverage local resources and assist local agencies and programs to sustain services critical to the residents and families who are struggling financially, physically and mentally. These programs primarily help LMI persons and families to prevent homelessness, to obtain life skills, to function as normal persons in a family or in the society, to have decent living conditions, and, for some, to move themselves out of poverty situation. While it is impossible to know the actual number of poverty-level families will be reduced through these programs, it is obvious that almost all programs the City's CDBG program supports focus on helping LMI persons and families.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

Lee's Summit has been taking a rather comprehensive approach to address poverty in our community. This approach utilizes the efforts of a wide range of agencies and organizations and funding from a wide variety of sources. Programs such as social services to meet the basic needs of LMI individuals and families, shelter and counseling for domestic violence victims, free food for chronically hungry school children, mental health services for children and adults, services for abused children, and counseling for adults with substance addiction. This cooperation between the City and local not-for-profits and faith-based organizations continues to grow. In recent years, new services have started to expand into Lee's Summit due to increase in need.

The City makes every effort to coordinate the implementation of its existing affordable housing programs—the First-Time Homebuyer Program, Minor Home Repair Program, and Lee's Summit Social Services—with social service agencies involved in providing housing services to populations that are of low and very low income.

SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

SPECIAL NOTE: THE FOLLOWING SECTIONS ARE RESERVED FOR THE 2020-2021 ANNUAL ACTION PLAN CONTENTS. THE ANNUAL ACTION PLAN HAS NOT BEEN DEVELOPED AS OF THIS VERSION.

Expected Resources

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

The Community Development Block Grant is the only known resource to be available to the City of Lee's Summit from various federal resources to address the identified community needs. Local agencies will have opportunities to apply for the ESG grant through the State of Missouri. Public housing needs may also be met with other HUD grants to be awarded to the Lee's Summit Housing Authority. Local agencies will continue

to make efforts and explore new funding sources for their programs to meet client needs.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	350,000	0	1,000	351,000	0	Expected CDBG fund allocation from HUD for Program Year 2020-2021, plus unused funds from prior year activities. No program income is expected.
General Fund	public - local	Admin and Planning	60,000	0	0	60,000	0	Staff administering the CDBG program will be partially funded with CDBG grant, not exceeding the allowable 20% of the CDBG annual grant amount. The remainder of staff time cost will be covered with the City's general fund.
Public Housing Capital Fund	public - federal	Housing	153,000	0	0	153,000	0	Lee's Summit Housing Authority anticipates that HUD public housing capital improvement fund to the agency will be the same amount as last year's.

Table 54 - Expected Resources – Priority Table

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how

matching requirements will be satisfied

The CDBG funding will leverage other resources for most of the services and programs that the CDBG program assists. For CDBG administration, the City will cover a portion of the administrative cost with its general fund. Lee's Summit Housing Authority projects leverage other federal funds for capital expenses. Other subrecipients combine CDBG allocations with a variety of resources, including in-kind donations, local grants, local churches, local charities, private foundations, private fundraising, State funding resources, etc. The City will not require funding match for any of the CDBG funded programs and projects.

If appropriate, describe publically owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

Introduction:

Community Development Block Grant Program (CDBG) Reference 24 CFR 91.220(I)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed
 2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan
 3. The amount of surplus funds from urban renewal settlements
 4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan.
 5. The amount of income from float-funded activities
- Total Program Income

Other CDBG Requirements

1. The amount of urgent need activities
