

Future Land Use & Fiscal Impact Scenarios

Joint City Council & Planning Commission Workshop #5

~~March 11, 2021~~

October 17, 2023

Overview

Comprehensive Plan

Describes your vision of the future
Your intention & goals

1. Land Use Pattern
2. Future Land Use
3. Typology
4. Place Types
5. Design Principles

Zoning & Regulations

Describes your rules for what can
be developed where and how

1. Zoning Ordinance & Map
2. Unified Development Code
3. Access Management Regulations
4. Infrastructure Design Standards
5. Building Codes

Big Five Ideas

- *Sustain and enhance City services, public facilities and infrastructure to protect a high quality of life.*
- *Maintain thriving, quality neighborhoods that connect a diversity of residents throughout the community.*
- *Concentrate multi-family & commercial development in five special & unique Activity Centers.*
- *Preserve natural resources, open space, recreational, cultural and historic resources.*
- *Fuel our future by growing the tax base and jobs.*

PRESERVE

PRESERVE Lee's Summit's high value resources for enjoyment by future generations.

The purpose of the preserve approach is to provide a green and historic framework that defines the City's character and quality. Preserve is a set of strategies to protect and restore parks, open space, natural wooded areas, streams, lakes and rivers. Preserve also identifies valued historic and cultural landmarks and resources. Carefully manage change to enhance the setting and protect the quality, access and management of these areas. Where feasible, the City should acquire environmentally sensitive lands and cultural sites and preserve and reuse historic buildings as an opportunity to enhance quality of life. The overall character of the land will not change from today in these areas.

INCLUDES:

Parks & Open Space
Natural Wooded Areas
Streams, Lakes & Rivers
Historic Places
Cultural Resources

Amount of Change

CHARACTER:

Character refers to the attributes and identity of an area.

ENHANCE

ENHANCE existing single-family neighborhoods with public infrastructure investment, connectivity improvements and flexibility to keep the character but meet changes in market demand over the next 20 years.

Enhance existing community strengths. Lee's Summit's single-family neighborhoods are the community's foundation. To continue to make them attractive and fit the needs of the future market, investment and flexibility is needed. The overall character of the single-family neighborhoods will not change. They will continue to be single-family but enhanced with public infrastructure investment, connectivity improvements and some flexibility to meet changes in market demands over the next 20 years.

INCLUDES:

Existing Residential Neighborhoods

Amount of Change

DENSITY:

Density refers to the number of people per acre in any given area.

STRENGTHEN

STRENGTHEN access, appearance, activity, connectivity and resiliency of community anchors and Downtown.

Strengthen our long-standing, most important community assets. These assets include community anchors and the heart of the community - our Downtown. We will implement strategies to improve access and make them more resilient into the future. The character of these areas will not change, they will be fortified to survive and thrive into the future.

INCLUDES:

Downtown Lee's Summit
Existing Commercial Nodes
Existing Neighborhood Centers
Lee's Summit Municipal Airport
Industrial
Community Anchors
Civic Facilities
Emergency Service Facilities
Primary/Secondary Education Facilities

Amount of Change

TRANSFORM

TRANSFORM and revitalize areas of the community using public improvements, incentives and community partnerships to make them more resilient and adaptive to future change.

Transform the character, use and density of prioritized undeveloped areas and areas targeted for revitalization. These are areas of the community with the greatest opportunity or need for attention and effort to be resilient into the future. Public improvements, private incentives and community effort will focus on areas for revitalization, transformation and new construction activity.

INCLUDES:

Activity Centers
Major Corridors
New Commercial Nodes
Existing Strip Commercial
New Neighborhood Centers
New Residential

Amount of Change

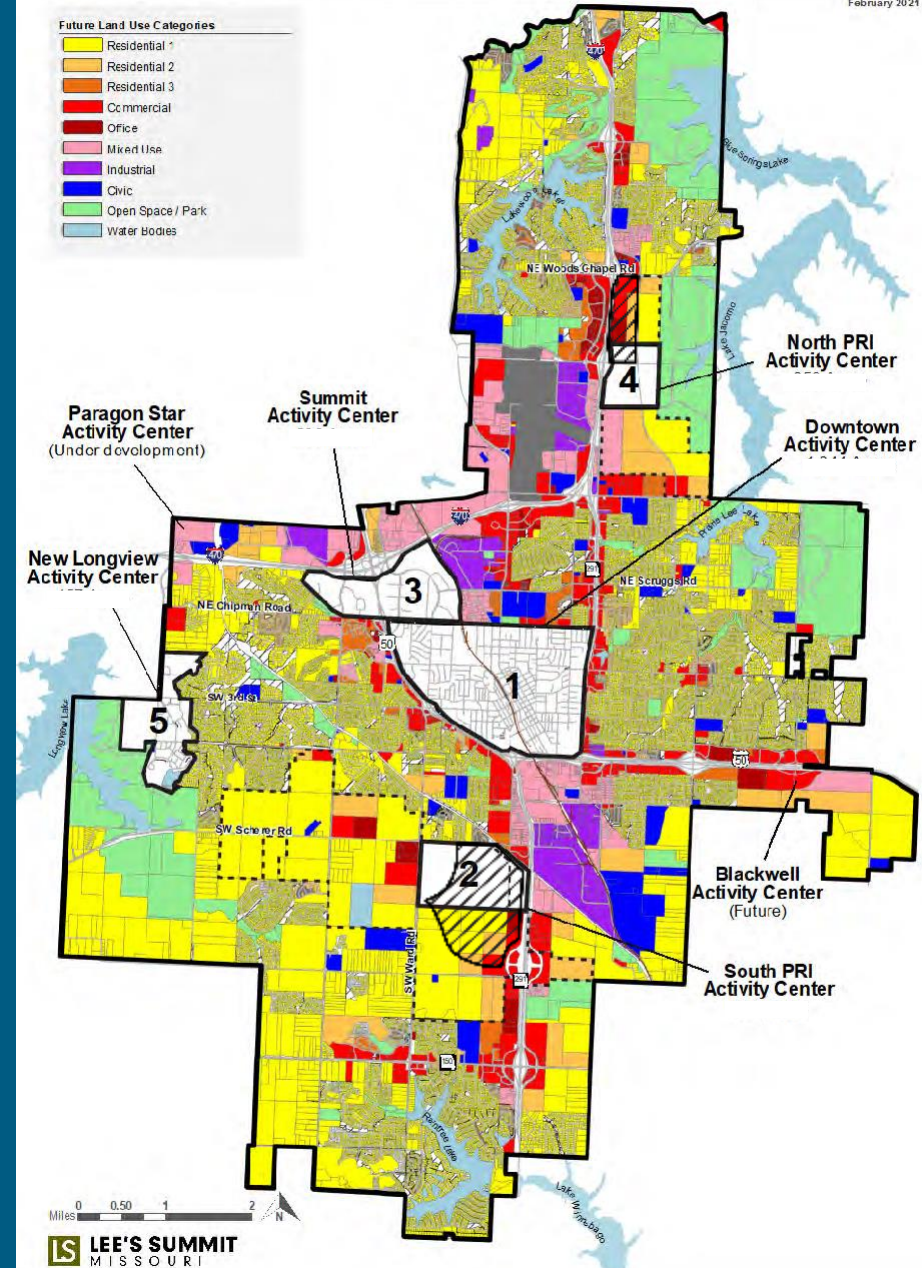

USES:

Uses refer to the activity and function of an area of land.

Future Land Use

-- *What can be built upon and what it can be used for*

- Not the same as zoning
- Simplified land use categories
- Within a category the darker the color the more intensity of use
 - Category 1, 2, 3 for residential = yellow to burnt orange
 - Nonresidential = light pink to dark purple

Fiscal Impact Model – Current Land Use

POPULATION

2020: 100,300 people
 Growing 1-2% Annually
 65+ will see largest growth over next 20 years

RESIDENTIAL

Total Acres: 12,902
 Current Housing Units:

- Category 1: 30,049 (72%)
- Category 2: 5,562 (13%)
- Category 3: 6,214 (15%)

TOTAL: 41,825

LAND USE

City Limits Total Area:

- 65.87 square miles
- 42,157 acres

Undeveloped Acres: 11,670
 Developed Acres: 25,192
 Parks/Open Space: 4,289

NON-RESIDENTIAL

Current Acres:

- Commercial: 1,606
- Industrial: 1,006
- Mixed Use: 83
- Office: 286

EMPLOYMENT

2020 Jobs (ESRI): 95,471
 Top 3 Professions:

- Education / Health Care & Social Assistance
- Professional / Scientific / Management Services
- Retail Trade

OPPORTUNITIES

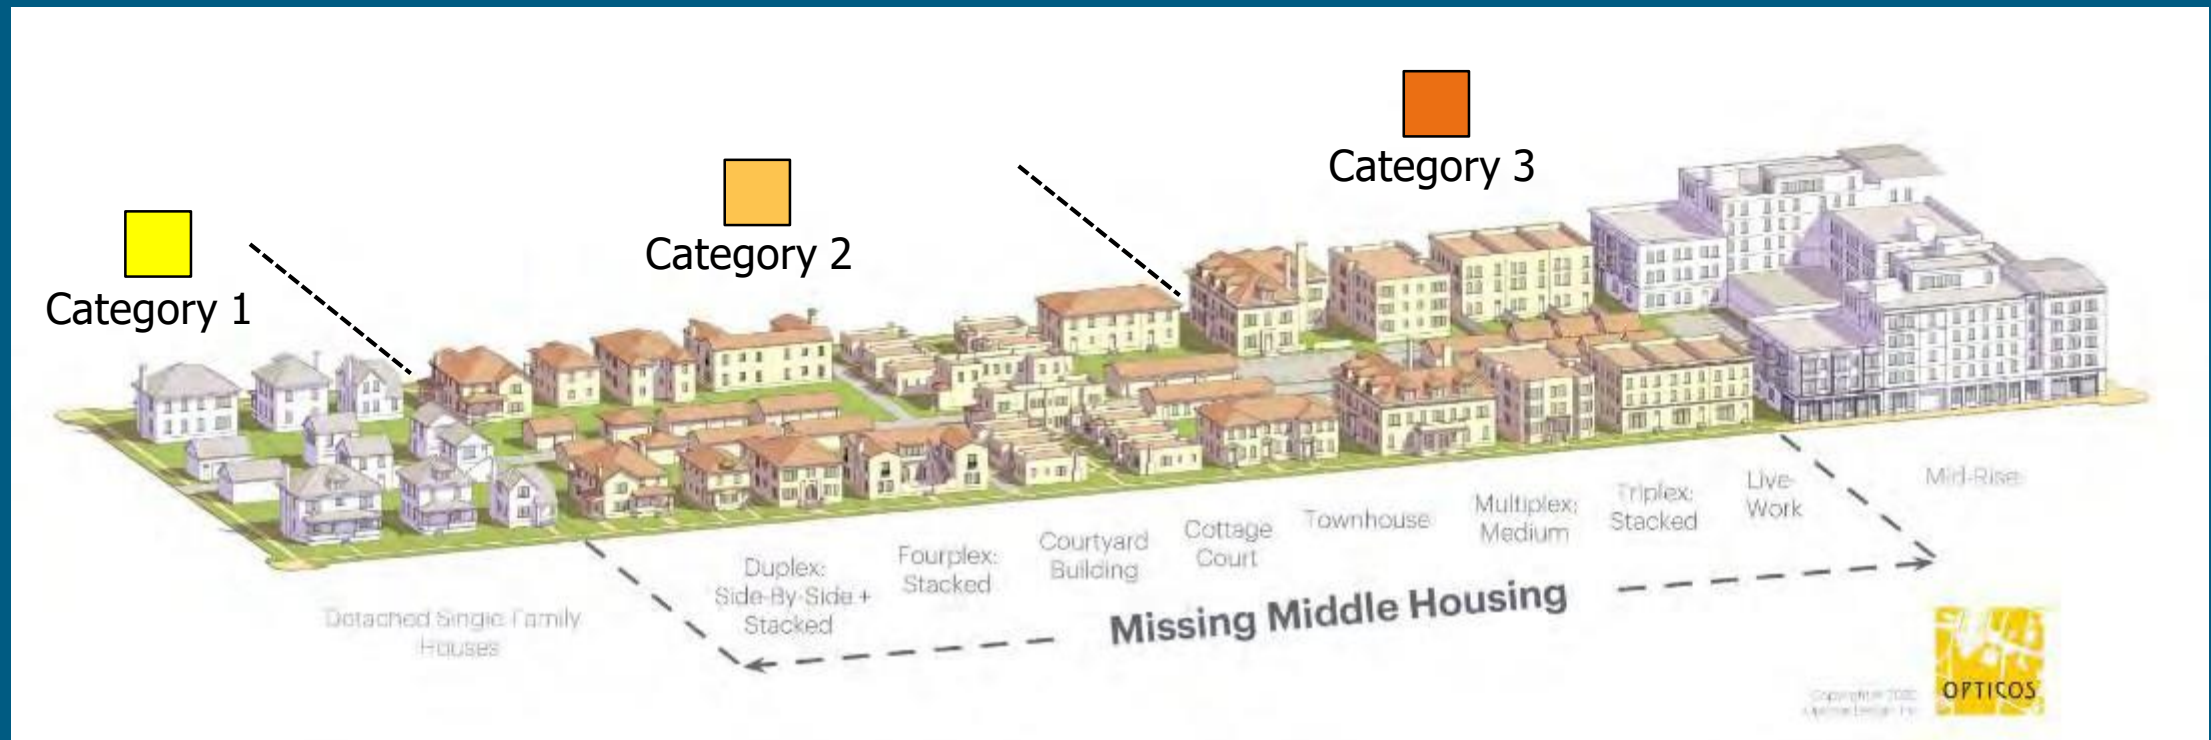

- More Retail
- Industrial / Flextech
- Housing to Meet Changing Market Demands

Residential Development - Current

Current Residential Development By Type	Current Acres	Current Dwelling Units	% Current Residential Acres by Residential Types	% Current Dwelling Units by Type	Current Dwelling Units/Acre	Current Residential Acres Per Dwelling Unit
Category 1	11,815.65	30,049	92%	72%	2.54	0.39
Category 2	665.21	5,562	5%	13%	8.36	0.12
Category 3	421.28	6,214	3%	15%	14.75	0.07
TOTAL	12,902.14	41,825	100%	100%		

“Missing Middle” Housing

- Fills gap between traditional detached single-family housing and larger multi-unit apartment buildings
- Provides increased housing options and affordability
- Supports context of existing neighborhoods as infill option

Market Demands & Needs for 2040

38% Increase in Population

	2020	2025	2030	2035	2040	Population Growth

Current Acres of Nonresidential

2980.94

New Acres for Nonresidential Development

610

Increase (20%)

20%

Fiscal Impact Model

Purpose & Approach

- To evaluate the benefits and cost of different land use mixes for the community as a whole
- Includes expected revenues and expenditures for new development
- Shows the cost-benefit for different scenarios

Revenues

Property Values & Tax Revenue

- Based on 2019 Jackson County & Cass County property tax databases
- Lee's Summit Property Tax Rate = 1.46%

Sales Tax

- General Fund, Parks, CIP, Transportation – assumes sales tax renewal
- Follows population growth

Other General Revenues

- All other General Fund Revenues
- Follows population growth

Expenditures

Capital Expenditures

- Include Fire, Police, Parks, Trails, Streets, Sidewalks
- Departments provided key data

Other General Expenditures

- All other General Fund Expenditures
- Continues current level of services to new growth
- Follows population growth

Additional Items

Water & Sewer

- Water & Sewer revenue and expenditures are outside of the model
- Water & Sewer costs will be a map layer to demonstrate some areas are more expensive/more difficult to serve

*How Should We Develop over
the next 20 years?*

Fiscal Impact Model - Land Use Scenarios

Scenario 1

Full Build Out of City with Current Land Use Pattern

Scenario 2

Full Build Out of City with Recommended Future Land Use Pattern
