RE: 90 foot T-Mobile tower  
CASE: PL2016053

Dear Sirs,

We have reviewed the information you sent us regarding the tower. Our only concern is as follows:

If the tower or functioning of the tower equipment at any time negatively impacts our electronic communications, T-Mobile services, or otherwise disrupts our communication ability the responsible party must immediately make appropriate repairs or revisions at their sole expense.

This is important because our Lee's Summit location has electronic communications for health and safety or our consumer individuals having developmental disabilities at this location, and we also have communication with our other site locations in Independence, and in Kansas City, Missouri.

Thank you for your attention to this. We trust that as you proceed with your review of this project that you will make appropriate provisions to protect our propriety operational needs to communicate.

Sincerely,

Rebecca Case  
Executive Director  
Developing Potential (DPI)
