

# Statement Regarding Seasonal Air-Supported Dome View High Sports + Entertainment

**To: Lee's Summit City Council Members**

The Summit Church, located at 3381 NW Chipman Road in Lee's Summit, respectfully submits this statement in support of the proposed seasonal air-supported dome at the View High Sports + Entertainment complex, which is scheduled for consideration on March 24, 2026.

When The Summit Church purchased the approximately 40-acre parcel located at the southeast corner of View High Drive and Chipman Road, the vision was to relocate from our downtown location at 2nd Street and Douglas Street and establish a campus that would allow us to expand our mission while allowing for community-serving development on the remaining property. Deed Restrictions were put in place to help preserve this long-term vision.

In consultation with legal counsel, The Summit Church has reviewed the proposed seasonal dome in light of those Deed Restrictions and confirms we do not object to the proposed height, use, or location of the facility.

We understand there is ongoing demand within the community for additional indoor recreational space during the winter months, when outdoor athletic fields are often unavailable due to weather conditions. A limited-duration, seasonal facility will help address that need and provide a benefit to the community.

For these reasons, The Summit Church supports the proposed seasonal air-supported dome at the View High Sports + Entertainment complex. We appreciate the City Council's careful review of this matter and its continued attention to the long-term planning goals of the community.

Sincerely,

THE SUMMIT CHURCH OF LEE'S SUMMIT

# Resident Statement of Support - Seasonal Air-Supported Dome

## **View High Sports + Entertainment**

**To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

# **Resident Statement of Support - Seasonal Air-Supported Dome**

## **View High Sports + Entertainment**

**To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

# **Resident Statement of Support - Seasonal Air-Supported Dome**

## **View High Sports + Entertainment**

**To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

### **To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

# Resident Statement of Support - Seasonal Air-Supported Dome

## View High Sports + Entertainment

**To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

# **Resident Statement of Support - Seasonal Air-Supported Dome**

## **View High Sports + Entertainment**

**To:**

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

**For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.**

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +

Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

## Letter of Support for View High Sports Seasonal Air-Supported Dome

### Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.
