

# **City of Lee' Summit Pedestrian and Vehicular Safety Mitigation Plan**

## Example of security needs for a large downtown Lee's Summit Event

- Traffic and Pedestrian safety currently managed using both Type III barricades and water barricades.
  - Both have drawbacks and limitations related to reliability.
  - City staff responsible for setting up and monitoring all barricades throughout the event.
- While researching possible alternatives staff asked for a system that was:
  - Flexible
  - Easy to deploy
  - Effective

Utilizing the criteria of flexible,  
ease of deployment and  
effectiveness staff identified:

Meridian Rapid Defense  
Group’s, Archer barricade  
system

The Archer barricade system allows for easy deployment and the flexibility to adjust to the various roadway circumstances that exist.

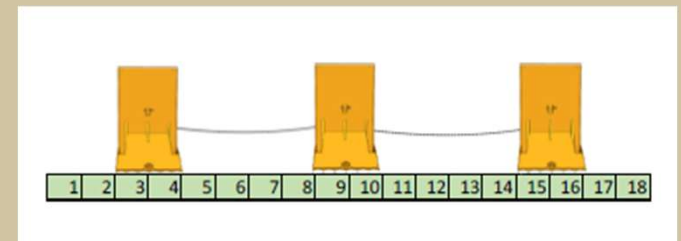

Multiple barricades are attached together to provide the required protection.

The barricades are stored on a trailer system allowing for quick deployment and set up.

## Archer® 1200 Barrier Specifications

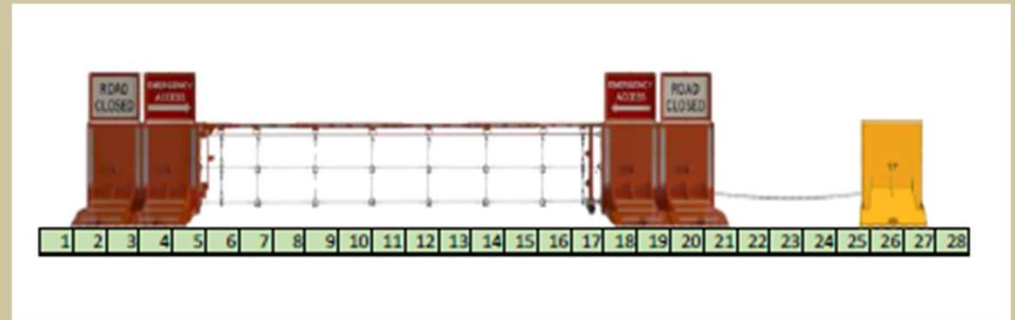

## Meridian Archer® Trailer Kit 1000

The system also allows for emergency vehicle access through a gate system that, when closed, provides the same level of protection as the barricades themselves.

## Possible Deployment Examples

## Possible Deployment Examples
