- The application shall be accompanied by at least one set of drawings to clearly indicate the requested variance in relation to the property and/or structures. Board's Authority

- The Board of Zoning Adjustment may grant a variance, only if application of the UDO when applied to a particular property, would significantly interfere with the use of the property.
- The Board's authority is limited by the statutes of the State of Missouri and the UDO. The Board may only grant a variance if, in its discretion, each of the variance criteria is met (See Statement of Variance Criteria). STATEMENT OF VARIANCE CRITERIA (NON-USE)

In accordance with Section 2.530.B.3 of the Lee's Summit Unified Development Ordinance, the applicant must meet each of the following requirements to support the granting of the requested variance. **Failure to complete each may result in an incomplete application.** Explain **IN DETAIL** how this application meets each of the following requirements.

1. The granting of the variance will not adversely affect the rights of adjacent property owners or residents.

This side yard setback variance will be similar to others in the neighborhood

2. The granting of the variance will not be opposed to the general spirit and intent of the ordinance from which the variance is sought.

This is ag zoned property and many of the properties on this street have barns & storage buildings like I propose

3. The variance requested will not adversely affect the public health, safety, morals, or general welfare of the community.

This build is to be set back hundreds of feet from the road and won't even be visible. My next door neighbor has a building like I propose and has no objections.

4. The variance requested arises from a condition which is unique and peculiar to the property in question and which is not ordinarily not found in the same zone or district, and further, is not created by an action or actions of the property owner or applicant.

LEE'S SUMMIT MISSOURI

STATEMENT OF VARIANCE CRITERIA (NON-USE)

due to the solar field location, the variance is needed to fit the building in the space that is available.

5. Substantial justice will be done by the granting of this variance.

Others in the area have similar side yard setbacks.

Further, in accordance with Section 2.530.B.2 of the Lee's Summit Unified Development Ordinance, the applicant must meet each of the following requirements to support the granting of the requested non-use variance. Explain IN DETAIL how this application meets each of the following requirements.

1. Practical difficulties exist that would make it impossible to carry out the strict letter of the Unified Development Ordinance when considered in light of the following factors:

a. How substantial the requested variation is, in relation to the requirement of the Ordinance.

not substantial due to the size and location of the requested variance.

b. The effect of increased population density, if any, on available public facilities and services, if the variance is allowed.

no effect for a metal storage building

c. Whether a substantial change will be produced in the character of the neighborhood, or whether a substantial detriment to adjoining properties will be created if the variance is allowed.

no detriment as it will be similar to many other properties on this street and area.

STATEMENT OF VARIANCE CRITERIA (NON-USE)

- d. Whether it is feasible for the applicant to pursue a method, other than a variance, to obviate the practical difficulty.

With the solar field it is necessary to fit into the limited location.

- e. Whether the interests of justice will be served by allowing the variance, in view of the manner in which the practical difficulty arose in consideration of all of the above factors.

With no conceivable, negatives from this variance, the practical use of this location only makes sense.

- f. Conditions of the land in question, and not conditions personal to the landowner. (The Board will not consider evidence of the applicant's or landowner's personal financial hardship unrelated to any economic impact on the land.)

The conditions regarding various obstacles make this location necessitate this variance
