Dear Members of the City Council,

I am writing to express my support for the proposed seasonal dome at the View High Sports Complex.

First, it's important to ground this discussion in the existing zoning. This land has already been designated for commercial use. That means—with or without the dome—some form of large-scale commercial development is going to occur. The real question isn't whether there will be impact, but rather what type of development best serves the broader community.

In that context, a sports complex with a seasonal dome is a strong, community-aligned use. It provides year-round opportunities for youth athletics, training, and local events. It also positions Lee's Summit to attract tournaments and visitors from surrounding municipalities, which brings measurable economic benefit to local businesses—restaurants, hotels, retail, and service providers.

There has been concern raised by a small group of nearby residents. While those concerns deserve to be heard, it's also worth noting the scale relative to the broader community that stands to benefit. Public decisions should weigh both local impact and citywide value.

On property values, there is a long-standing assumption that nearby commercial or recreational development negatively affects home prices. In practice, the data rarely supports that as a consistent outcome. In many cases, proximity to well-maintained amenities—especially something as active and family-oriented as a sports complex—can increase desirability for certain buyers. There is a clear segment of the market that values convenience to youth sports, training facilities, and community activity centers.

This proposal aligns with growth, not disruption. It's an investment in youth sports, in economic development, and in making Lee's Summit a regional destination rather than just a participant.

I encourage the Council to take a broader view and support the seasonal dome as part of a thoughtful, forward-looking use of already commercial-zoned land.

Respectfully,

Rob Ellerman

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name: Kelly O'Bryan

- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name: Theresa Blackwell

Resident Statement of Support - Seasonal Air-Supported Dome

View High Sports + Entertainment

To:
Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Lee's Summit City Council Members

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports + Entertainment complex and respectfully urge the City Council to approve the seasonal air-supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church. That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds, if not thousands, of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

- lost family time
- long weeknight commutes
- keeping children up later on school nights
- increased travel costs for fuel
- frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, as well as mine, to train and play closer to home, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winter use by one organization. The seasonal dome would therefore provide an opportunity for other

Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit. In addition, the seasonal dome represents an opportunity to:

- keep youth sports activity local to Lee's Summit
- reduce travel stress on families during winter months
- allow children to return home from training earlier in the evening on school nights
- keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name: Josh Duffy

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Aaron Mazanec

• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Alisa Seidelman

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Andrea Rice

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name anthony Grego

• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Aubree Smith

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Audrey Kieff

there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Brad Weathers

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Brian Barton

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Brooks Ingrassia

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Casey Brownsberger

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Cheri Weathers

• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Christopher Zieber

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Courtney Clemenson

• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Daphna McGilchrist

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Dave Gale

there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Derek Stanley

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Emma Gordon

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Fady Gergis

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Gabby Ramsey

there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Jalonna Bowie

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Jeff Sallee

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Jennifer Ward

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Jill Sanchez

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name John Pruden

• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Josh Lansdale

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Kari Duerfeldt

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Keili Kruger

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Keith Beers

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Kim Cunningham

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Kristi Marshall

• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Kyle Robbins

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Lana Flynn

there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Lindsey Myers

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Madison Ulrich

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Matt Cross

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Megan Mosier

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Mike Deaver

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Missy Staples

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Misty Brewer

seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Natashea Brown

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Quinn Mosier

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Rebecca Hernandez

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name RUBY Hull

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Sandra Bandelow

• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Sean Korzdorfer

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Stacy Dumas

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Tara Cox

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Tracy Tran

Letter of Support for View High Sports

Seasonal Air-Supported Dome

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:

Support Indoor Winter Sports Access

View High Sports + Entertainment is requesting approval from the Lee's Summit City Council for a seasonal air-supported dome that would provide much-needed indoor turf space during the winter months.

Currently, Lee's Summit has extremely limited indoor turf availability, which forces many local families to travel 30 minutes or more multiple nights per week for youth sports practices and training.

This seasonal dome would operate for 16 weeks each winter and would allow more Lee's Summit athletes to train and compete closer to home, reducing travel time for families and keeping youth sports activity in our community.

If you support expanding indoor sports opportunities for Lee's Summit families and youth athletes, please consider signing this statement of support.

Lee's Summit City Council Members
I, the undersigned resident of Lee's Summit or the surrounding community, express my strong support for the seasonal air-supported dome at the View High Sports +
Entertainment complex and respectfully urge the City Council to approve the seasonal air- supported dome request coming before you on March 24, 2026.

As a parent, resident, and / or member of the Lee's Summit community, I believe this
seasonal facility will directly and meaningfully improve the quality of life for my family, other local families, and youth athletes.

Youth sports participation continues to grow rapidly across the Kansas City region, yet
there remains a significant shortage of indoor turf space during the winter months. In fact, Lee's Summit currently has only one small indoor turf field, located at Lakeland Church.

That field is older and only a fraction of the size of a full soccer field, which means it is only capable of accommodating a small fraction of the current demand from youth athletes and club sports organizations.

As a result, hundreds — if not thousands — of Lee's Summit families currently travel 30 minutes or more to other municipalities (many are doing so multiple nights per week) for practices, training sessions, and games during the winter season.

These travel demands create real burdens for Lee's Summit families, including:
• lost family time
• long weeknight commutes
• keeping children up later on school nights
• increased travel costs for fuel
• frequent reliance on fast food due to travel schedules

Approving the seasonal dome would provide an opportunity for many Lee's Summit families, including mine, to train and play in our own community, reducing travel and giving parents and children valuable time back in their day.

The dome would operate only during a limited 16-week winter period beginning November 25 each year, providing additional indoor capacity during the months when outdoor fields either cannot be used or when use of outdoor fields creates health and safety concerns due to prolonged exposure to cold temperatures or precipitation.

Importantly, the primary indoor turf field at the facility has already been leased for winteruse by one organization. The seasonal dome would therefore provide an opportunity for other Lee's Summit athletes to have access to indoor training opportunities here in Lee's Summit.

In addition, the seasonal dome represents an opportunity to:

• keep youth sports activity local to Lee's Summit
• reduce travel stress on families during winter months
• allow children to return home from training earlier in the evening on school nights
• keep sports-related spending such as training, meals, and activities within our community instead of other municipalities

Lee's Summit continues to grow as a family-focused community, and facilities that support youth development, recreation, and healthy lifestyles are an important part of that growth.

For these reasons, I respectfully urge the City Council to approve the seasonal air-supported dome request at View High Sports + Entertainment.

This facility will serve local families, youth athletes, and the broader community by expanding opportunities for recreation, training, and healthy activity within Lee's Summit.

I appreciate your service to our city and respectfully ask for your support.

Sincerely,

Name Vanessa Hargrave
