Junction City, KS 66441

Date: May 16, 2025
Project No.: A24D2009
Subject: Stormwater Report
Project: Smalls Sliders – 1050 SW Jefferson Street, Lee's Summit, Missouri

Introduction

Paxvesta, LLC is proposing to build a new 930 square foot Smalls Sliders at 1050 SW Jefferson Street in Lee's Summit, Missouri. This site will have a total land disturbance of 0.88 acres. This memo is to provide site-specific stormwater calculations. For quality and quality control for this site please refer to the Oldham Village report done by Engineering Solutions dated May 22, 2024.

Proposed Conditions

The proposed site will include the drive-through building, outdoor patio, drive lanes and parking.

0.07 Acres of Pervious Area

0.81 Acres of Impervious Area

See **Appendix A** for proposed site conditions.

Stormwater Runoff Calculation

The project site stormwater runoff was calculated using the data supplied in the Oldham Village report done by Engineering Solutions dated May 22, 2024. See **Appendix B** for the Hydraflow Hydrographs report.

Total Site Discharge 2YR = 3.3 CFS, 10 YR = 5.5 CFS, 100 YR = 8.6 CFS

Storm sewer was sized using Hydraflow Storm Sewers using the Rational Method to handle the 100-year storm. See **Appendix C** for the Hydraulic Grade Line Calculations and Profiles.

Conclusion

The proposed Small Sliders matches the proposed use for this site and all quality and quantity controls were covered by the regional detention listed in the Oldham Village report done by Engineering Solutions dated May 22, 2024. The site-specific run-off is shown above, and the on-site storm sewer was sized to handle the 100-year storm.

Sincerely,

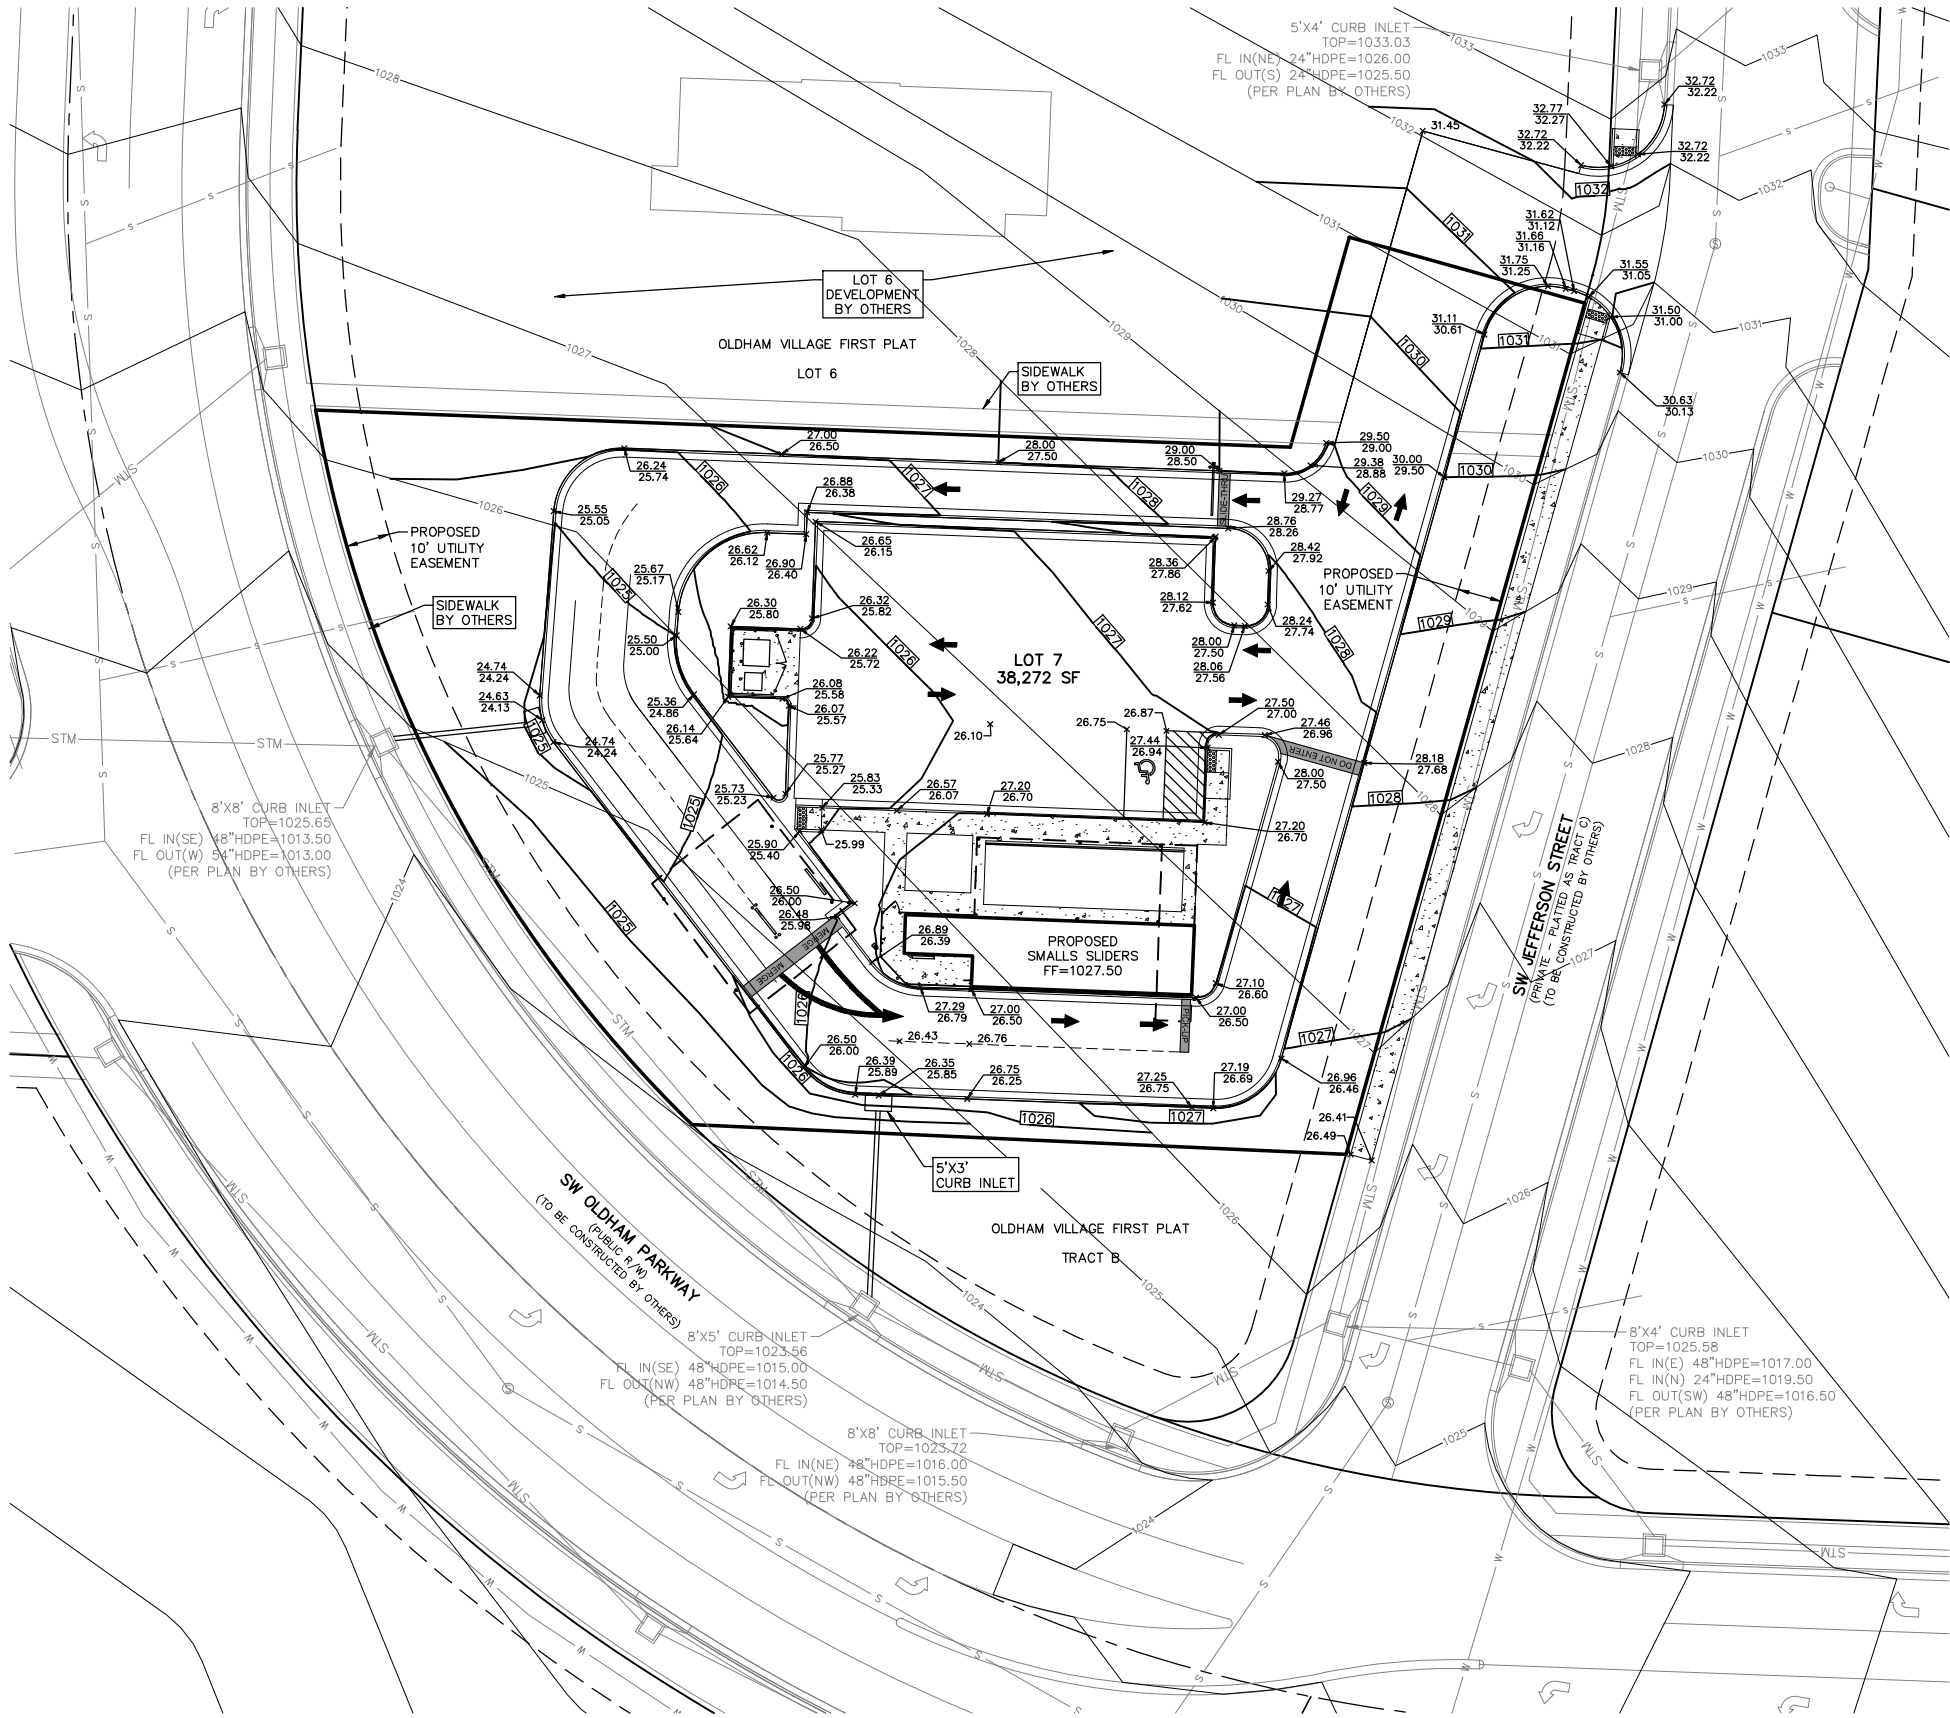

Randy Purdue, P.E.
Project Manager
