Village at View High 2nd Plat
Lee's Summit, MO

Modification Request to the required Medium Impact buffer on the West property line

This letter is to serve as a request to not install a Medium Impact Buffer along the Westerly property line between the apartment project and this development. The reason for this modification request is

- The westerly property line has proposed sanitary and storm lines being constructed along the property line making the installation of plantings impossible along the property line
- The proposed townhomes within Village at View High 2nd are similar in style and use to the proposed apartment units

We are available to discuss this issue further or provide further details.

Thank You,

Matt Schlicht
