

Project: Lots 1 – 6, Main Orchard

This memorandum is to serve as a guideline for the home construction on Lots 1, 2 & 4– 6, Main Orchard. Lot 3 is an existing 1,100 sf home constructed around the early 1900's.

Existing Area Description

The proposed development is located within an area of Downtown Lee's Summit that is one block west of Douglas Street and two blocks south of Chipman Road and the adjacent area is all zoned RP-2, Planned Two Family Residential District. The area to the north and west is single family and duplex family homes that were constructed in the 1950's with an average home size around 1,050 sf and a lots size of approximately 15,000 sf. Many of the existing homes that were constructed in the 1950's can be described as a mid-century ranch style home. These homes are typically rectangular in shape and have a long linear presentation toward the street with a single stall parking garage on one end of the home. Within the development area there are a few homes there were constructed in the early 1900's and have a typical "American Foursquare" and "Bungalow" style designs, with home sizes being 1,500 sf and 1,000 sf respectively and the lots sizes are approximately 0.50 acres in size.

Development Plan Description

Lots 1, 2, 4, 5 and 6

-These lots are going to be available for purchase by individual buyers to construct a new home. The home will be required to comply with the required items listed in the "House Characteristics" section of this memorandum.

Lot 3

-This lot has an existing "Bungalow" style home that is approximately 1,100 sf with a full stone foundation. The home has a dormer and a full house width front porch. There is not an existing garage and the driveway is gravel. The purposed development plan illustrates future construction of a two-story garage / apartment with a footprint of 1,200 sf. The intent is to build a lower level two stall garage for the existing home and a one stall garage for the second-floor apartment. This lot will be maintained as one owner and the house and garage unit will remain as a rental.

Requested Modification to the height of the garage structure on Lot 3 not to exceed the height of the principal structure. The principal structure is shown below in the Table 1 and the request is to construct the garage to a maximum height of 26 feet. With the setback from the right of way and location on the lot the structure will not appear imposing on the existing structures, but the height will allow for the construction of home elements to keep the architectural style consistent.

Table 1. Existing House Height Measurements

Top of Hip Roof	22' – 10"
Top of Lower Hip Roof	19' – 10"
Average Building Height	21' – 4"

*Modification is to allow an increase of 4' – 8" higher Loft / Garage

House Characteristics

Minimum Floor Area	1,000 sf
Garage	Minimum Single Stall (Detached or Attached to Residence)
Garage Location	No street facing overhead garage doors (Detached or Attached)
Front Porch	Minimum width of 50% of Total House Width with a 6-foot depth
House Style	Two-Story or Single Story with Dormer (American Foursquare, Bungalow, Craftsman)
Driveway Width at ROW	16 Feet

House Style

The style of the home should include front porches that are facing the street right of way to promote pedestrian and neighborhood connectivity. This will include incorporating a walkway connection from the front of the home to the public sidewalk. The public sidewalk will not be constructed with the development, but the connection shall be provided for. The driveway width at the street should be limited to 16 feet to limit the amount of concrete mass on the site but the driveway width can expand behind the home to allow for a multi stall garage. The home shall be constructed in such a way that the entry to the home shall incorporate a minimum of two steps from the sidewalk grade to the front porch. Front porch must incorporate a minimum of two column elements to delineate the porch with a minimum of 30% of the porch being constructed with a railing or knee wall.

House Color and Material

The developer will have the authority to review and approve all home colors, materials and styles prior to building permit approval.

The front of the House siding shall consist of multiple types of house siding to vary the appearance. Examples would include but not limited to lap siding or shake shingle combinations with stone or brick. The front and two sides of the home shall provide trim around window and door elements to be painted in a color that is different than the main body color of the house.

Acceptable materials for exterior siding of homes

- Wood Panel, Shingle
- Stone or Brick Veneer
- Real Brick or Stone
- Fiber Cement Lap Siding, Panel or Shingle

Excluded materials for exterior siding of homes

- Horizontal or Vertical Vinyl Siding
- Horizontal or Vertical Metal Siding
- Stucco

The following pictures are illustrations of home materials and the intended appearance of the homes. The side and rear elevations shall maintain the principal home siding material around the entire perimeter of the home. The detached or attached garage shall maintain the same siding primary / secondary materials as the main house.

Home colors shall not be

- High Contrasting Color Palettes
- Florescent

The following pages are taken from Sherwin Williams and will provide options for the home colors and schemes, the final houses are not limited to these specific color palettes, but these are to be considered the basis for judgement of the final home options. White is not shown on these pages but is allowed as a home color.
