Notes

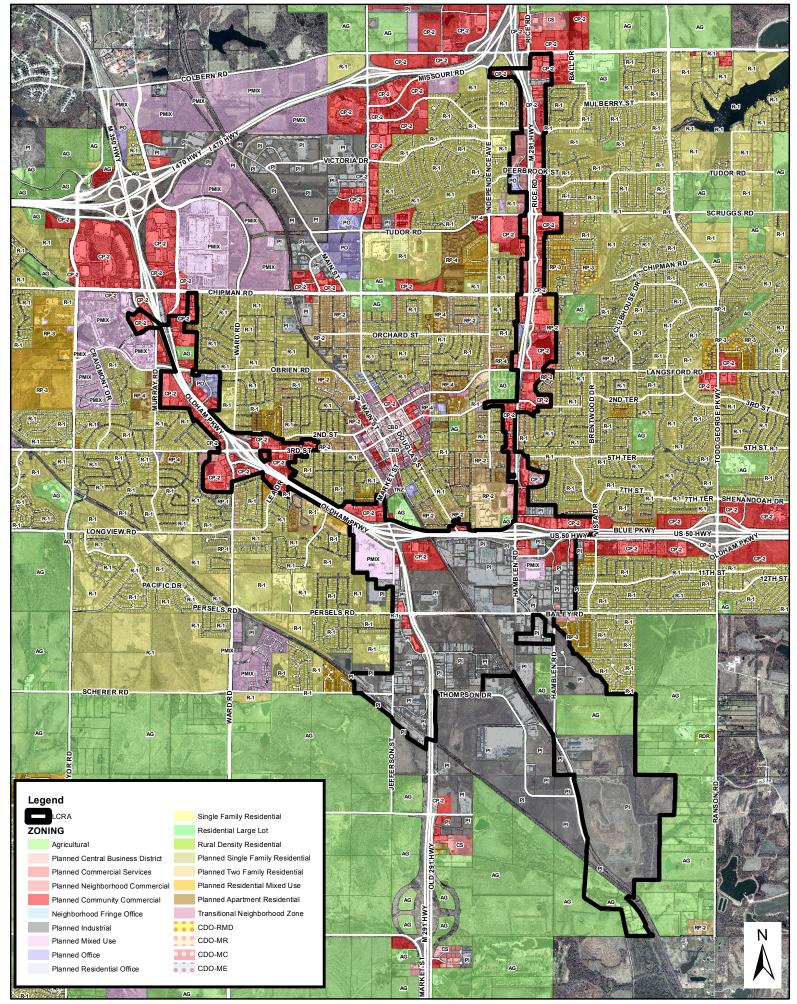

The average abatement duration is 19 years.

The average abatement during years 1-10 exceeds 90%.

The average abatement during years 11-20 is roughly 50% with some notable exceptions, and some projects incorporate an annual decline during this period.

Some incentive packages include a fixed PILOT per square foot (Belton, Kansas City, Raymore); this has been incorporated into the abatement percentage calculation to create uniform data.

Some calculations are rounded because the fixed PILOTs produce fractional percentages.
