Comment or Message: I would like to see SE 5th Street Terrace extended to the west and connect with SE Bordner Dr.
To connect these two streets it would only be about 75 yards in distance, and it would provide easy and safe access to Miller J Fields park.
Closing this gap makes a lot of sense at minimal costs. Please consider adding this project to your future capital projects.

Comment or Message: The Community Bus Service - ATA/OATS does not have enough funding. Lee's Summit does not have enough transit and transit is necessary to give people a cheaper transportation option. KCATA and the traffic engineer for Lee's Summit (Michael Park) recommend adding another fixed transit route that would travel between Downtown Lee's Summit and Independence Transit Center. The estimated cost to fund that project in 2019 was \$81,250 a year. The Community Bus Service - ATA/OATS would only need an increase of \$100,000 a year to fund this new fixed transit route. This presentation is from the city traffic engineer Michael Park (<https://lsmo.legistar.com/View.ashx?M=F&ID=6959380&GUID=46825E39-4252-4018-816B-4C845414071F>).

The city spends a lot more money per year on the Annual Curb and Gutter Replacement Program than The Community Bus Service - ATA/OATS. It is important to replace curbs, but curbs don't need to be replaced every few years. Curbs can last a while and I have seen curbs replaced that didn't need it. I think that there is some money waste in the Annual Curb and Gutter Replacement Program. A way to

add another \$100,000 a year to The Community Bus Service - ATA/OATS would be to take some money away from the Annual Curb and Gutter Replacement Program. The city would only need to take \$100,000 from the Annual Curb and Gutter Replacement Program and put that money towards transit.

Comment or Message: Please move the improvements of Scherer Rd. from Ward to Jefferson from 2026 to ASAP. Men, women, children, bike riders, parents with babies in strollers walk on this narrow road to get to the Rock Island Trail making it very dangerous. The road is currently narrow with NO sidewalk or shoulder and very few streetlights. There is no safe way to access the RI Trail from any of the homes from the stop sign at Woodland Glen east which includes the Pine Meadows subdivision and a neighborhood of townhomes. Getting to Ward to walk or walk to the trail is no safer. The RI Trail is great, but it's dangerous to get to it! Thank you.

Comment or Message: The Community Bus Service - ATA/OATS program does not have enough funding. Lee's Summit does not have enough transit and transit is necessary to give people a cheaper transportation option. KCATA and the traffic engineer for Lee's Summit (Michael Park) recommends adding 2 new fixed transit routes. One fixed transit route would go from Downtown Lee's Summit to Independence Transit Center and the other fixed route would go from Downtown Lee's Summit to 3-Trails Transit Center in South Kansas City. The estimated cost to fund the route that would go to Independence Transit Center in 2019 was \$81,250 a year. The estimated cost to fund the route that would go to 3-Trails Transit Center in 2019 was between \$96,250 and \$131,250 a year. The Community Bus Service - ATA/OATS program would only need an increase between \$150,000 and \$200,000 a year to fund this new fixed transit route projects. This presentation is from the city traffic engineer Michael Park, which has more information about the recommended fixed transit routes.
(<https://lsmo.legistar.com/View.ashx?M=F&ID=6959380&GUID=46825E39-4252-4018-816B-4C845414071F>)

The city spends a lot more money per year on the Annual Curb and Gutter Replacement program and the Overlay & Slurry Seal program than the Community Bus Service - ATA/OATS program. A transit funding approach may be to reduce both the Annual Curb and Gutter Replacement program and the Overlay & Slurry Seal program by \$150K-\$200K in support of transit and the reduction to Curb and Overlay funding would be proportionate to current funding allocations. The drop in pavement/curb level of service would not be very noticeable considering such a minor amount of funds (\$150K-\$200K) redirected from the \$6M+ combined annual programs. It is not equitable that transit is significantly underfunded compared to other programs. There needs to be more funding sources so that the city can fund more transit and road improvements (maintenance) at the same time. However, until there is another funding source, it is worth taking a small percentage of money from a highly funded program and moving it to transit. Removing \$150,000 each from the Annual Curb and the Gutter Replacement program and the Overlay & Slurry Seal program would be removing around 5% of the total \$6M+ combined annual programs.

Comment or Message: I don't know that Phase II of Ward Road Improvements, Chipman to NW OBrien will wait another 5 years. If anyone has driven the road, especially in the southern direction, from Chipman to O'Brien, the condition of the road is terrible. It also feels terribly 'overcrowded'. The maintenance along that stretch has not been good and a couple of years back, when sidewalks were placed right alongside the road, with no buffer/grass strip or other separation it became even more dangerous. Now that Ward Road has been opened and nicely improved to the north, it would seem time to work on this stretch. It would also seem that there may be some economy of scale, while working on Phase I, Ward Rd, O'Brien to Blue Parkway project. That project is long overdue and everyday we continue to have dangerous situations for children and adults alike, with no safe way to walk along Ward, between Lincolnwood and Blue Parkway, and particularly so close to Westview Elementary...

Comment or Message: Nothing on here for improving bicyclist infrastructure. It is terrifying in some parts of the city to ride a bike on the street as there are no bike lanes. The crossing at Persels and Ward for the Rock Island Trail is the worst designed crossing in the entire world. If you asked an engineer to design the most unsafe bicycle street crossing they would point at this and say there it is. Extraordinarily unsafe at any time. You need to connect the Rock Island at Jefferson to Greenwood. You need to make it safer downtown for cyclists. Either shutdown the streets to cars or make them 1 way streets.

Comment or Message: I would like to see a noise ordinance and hours of operation put in place for the airport. The increased low flying traffic over Lakewood is very concerning. We need to have hours of operation. Helicopters and other aircraft should not be practicing touch and goes at 1 lpm over a residential area. We have school aged kids and it wakes all of us up. I would also ask that we start charging the KCMO police department more for their practices. If they want to fly over the tax paying citizens homes of Lee's Summit at low altitudes, they need to pay a premium or find someplace else to practice.

Comment or Message: Please help protect the residents directly in the flight path on the north side of runway 11. The airport runway expansion has increased not only larger jet traffic but invited more uncontrolled practice time in the airspace over our homes. No one is willing to listen that we've seen more close landing/takeoffs, lower air traffic over our houses and increased helicopter practiced (KCMO police) after dark. We have video and have place calls to the airport after 11pm but it goes unheard.) Practices are rent-free on our tax dime and disturbance. We ask that these improvement plans include noise abatement improvements for the north side of runway 11, ordinances against takeoffs and landings on runway 11 after 9 pm and prohibited use of the Lees Summit tax payer funded airport for community services not tied to Lees Summit - ie: KCMO police. We are simply asking for the city to make its airport good for the neighbors it is knowingly disturbing (according to the recent Master plan) and to help maintain and protect the neighborhoods for which its funding is derived.

Comment or Message: For years the communities along Hwy 291/I-470 between Woods Chapel Rd and Highway 40 have been asking for improvements to Lakewood Way. There are plans to develop another subdivision (Stag's Field) at Bowlin Rd and Lakewood Way that will increase traffic along that corridor. Even before that, we have asked for road improvements to Lakewood Way. Can those road improvements be added to this CIP?

Also, a public pool for the residents of those same subdivisions on the east side of Hwy 291 would be nice. (Lakewood has their own public pools.) Although Fleming Park is nearby, I don't like swimming in lake water.

Comment or Message: Road improvements along Lakewood Way. We have crumbling shoulders, wavy areas from the heavy school busses, numerous repeat potholes. Would like to see it widened with shoulders and sidewalks for safety. I've seen school kids walking along it and there are hilly, curved areas with near blind spots.

When 470 backs up all that highway traffic ends up coming down the street at speed! And the neighborhood drivers can't get out.

Comment or Message: While we respect the city's desire to improve the airport, we do not respect or desire this airport to be any larger than it already is. Being located in a neighborhood that sits directly under the flight plan of many aircraft, the noise of the larger jets is deafening! After spending much of the past year working from home, being on phone and/or video calls, the constant noise has been a nuisance to say the least. Sure, having a commercial airport is good for our city, but at what cost? Talks of larger runways will only bring in larger planes/jets and that is not something we support. Find a way to improve what we have without making the airport larger - we don't need the noise or air traffic over the residential areas surrounding the complex.

Comment or Message: Please make improvements to the 291/Lakewood blvd/Lakewood way interchanges. These are important interchanges, buses travel these dangerous intersections daily during the school year. Traffic is already bad here, now there are new housing developments being built that will add to the traffic, there have been other proposed higher density housing projects in this area as well. Please get ahead of this problem area!

Comment or Message: I am proud to be a resident of Lee's Summit and see the vision and improvements being proposed. Unfortunately, the airport expansion is a huge detriment rather than an improvement. I moved to Lakewood in 1976 when the airport was developing in a rural area. Now that area is fully developed and planes are buzzing our homes, waking us up, night and day. I never envisioned living in a flight pattern as I currently do and am adamantly OPPOSED to extending this development further. The airport needs to remain small or move to a less populated area.

Comment or Message: As a long time resident of the Lakewood community, the noise issue of the larger planes and helicopters are an increasing nuisance. My house is directly beneath landing strip 11. I am opposed to the possible expansion allowing larger planes/helicopters due to the disruptions and noise they cause.

Comment or Message: The outer road, Lakewood Way, is dangerous- full of potholes, with no shoulders or sidewalks or bike paths and is often congested with traffic. It resembles a parking lot when 291 has accidents or road work. Obviously there's been no traffic study on it. Sometimes it's gotten so clogged with cars and trucks, that there was no way out or into our subdivision, Ridgewood Hills. Quite dangerous if there's an emergency which would prevent fire, police or ambulances and other emergency vehicles from gaining access. No add hundreds of apartments and hundreds more vehicles on the south side and the problems multiply.

Members of our subdivision have already complained about almost getting run over/hit by cars on Lakewood Way and Bowlin Road if they were on foot. Due to Covid, there's been no access to a real public meeting to discuss this. How hard is it to have a meeting also with Zoom access?

Comment or Message: I am a home owner in the Ridgewood Hills subdivision and strongly oppose the development and building of apartments bordering the south side of our subdivision at Bowlin and Lakewood. This would cause a severe increase in traffic and crime, affect wild life, pedestrian safety, add even more litter along Lakewood and surrounding our neighborhood, and decrease our home values.

Comment or Message: I have lived in the a ridgewood hills sub for almost 20 years. For years the communities between the wood chapel rd and 40 highway have asked for improvements in Lakewood Way. With the potential of yet another subdivision going in on Bowlin Road, these improvements are vital to the area. Can the road improvements be added to the CIP?

Comment or Message: For years the communities along Hwy 291/I-470 between Woods Chapel Rd. and Highway 40 have been asking for improvements to Lakewood Way. There are plans to build another subdivision at Bowlin Rd. and Lakewood Way that will increase traffic along that corridor. Can those road improvements be added to the CIP? Also, some sidewalks and biking lanes would be nice. Some subdivisions have no sidewalks (Arbores), and with traffic exceeding 55 mph often on Lakewood Way, we are "land-locked". Sidewalks and biking lanes along Lakewood Way would do a lot to improve the walkability and safety for walkers and bikers. Just yesterday I saw a group of three teens walking on Lakewood Way. Cars were swerving around them at high speeds. Often this road is used as an alternative to I-470, when that traffic is backed up. Our walkers and bike riders are not safe.

Comment or Message: We have lived in the same house since 1978. Each year the plane noise has increasingly gotten louder and more annoying. There should be a limit on the sound level and the amount of air traffic flying directly over our neighborhood. There also has been in the past 2 years training or recertification for landing helicopters (mostly KC Police Department) repeatedly taking off and landing during evening for a solid hour it seems. The rattling of our display of hanging dishes in the living room has been extremely annoying. Also, disrupting our evenings, especially in the summer when we are trying to enjoy the outside. We need a study on this kind of activity coming down runway 11 in alignment with our homes. Please listen to us and be our protective voice.

Thank you
BRuce Rosenbaum

Comment or Message: We have grave concerns about the new development in Stagg Field and the additional traffic it would incur on Lakewood Way. The road is often so heavily traveled now it's often hard to get out of our subdivision Ridgewood Hills. Lakewood Way needs major improvements before any development any development is allowed to proceed.

Thank you, Francie & Doug Hays

Comment or Message: I'm not a fan of the apartment complexes because the traffic would be to much. We are right by the lake. I fear it would take away from the park like atmosphere. Plus there looks to be a set of apartment complexes further north close to the Culver's off blue parkway and that would be too many in this area in my opinion. I would like to see a community pool for a few subdivisions that do not have access to one in their subdivision. Also would be nice to see bicycle lanes added to the street on the outer road of blue parkway coming off Bowlin rd. I see a lot of bicycles using that outer road.

Comment or Message: The Lee's Summit airport is getting busier and busier, louder and louder. Many mornings, very early in the morning, we are woken up by airplanes flying near our home! It feels like our home is being buzzed by planes all of the time, flying low. It is scary to think that with this much air traffic, there could be a plane accident and our homes are in the way! Please stop this from happening. Noise pollution is a real thing, and the safety of our neighborhood is at risk with more growth of the airport.

Comment or Message: I received a helpful magazine at the beginning of spring extolling the parks of Lee's Summit and particularly that they were planned so that people in any part of Lee's Summit could walk to a park. However, I don't find this to be the case due to major safety concerns regarding the lack of sidewalks, painted road lines, and speed enforcement along Campground Road. The speed limit is 25 but drivers regularly surpass 40. The lack of sidewalks or even lined shoulders prevent these roads from being walkable, run-able, or bike-able. Any capital improvement plans absolutely should include improvements to the safety of roads—especially near parks and recreational amenities like the campground—to protect Lee's Summit's smallest citizens.

Comment or Message: This is in regard Stags Field Development and around Bowlin /Lakewood way. I am opposed to this development as the area is not equipped due to the roads and resources. There are no sidewalks and the Lakewood way is high traffic and high speed it's used as an outer road for 291 and is quite busy and dangerous already. This development will impact the surrounding neighborhoods in a negative way. There's no walk ability or bike ability in the area and this is a bigger concern with increased traffic. I do not support this development in its current state.

Comment or Message: I'm curious about the commitment to the hundreds Lee's Summit residents impacted by the noise from the already growing air traffic. The military helicopters and small jets are already too much; if we wanted to live by MCI, I would. What does adding another airport hangar do for us besides make it a noisier place to live?

Comment or Message: The airport is a nuisance and no tax dollars should be squandered on it without first putting it to a vote of the citizens. We were denied the opportunity to vote on it when it would have made a significant difference. We are left with damage control.

Comment or Message: The Stagg Field development is another example of the City's insatiable appetite for tax base with inadequate consideration of the impact on the long-term quality of life and property values for existing residents.

Comment or Message: I am concerned about the airport expansion. There are a lot of neighborhoods that will be affected by the noise pollution as well as issues.
And for what gain?
