## <u>Issue/Request:</u>

An Ordinance determining and declaring the necessity of acquiring for public use certain permanent easements and right of way for street construction improvements associated with the proposed Browning Street extension between SE Oldham Pkwy and SE Hamblen Rd; authorizing the city manager and his designees to negotiate for the purpose of acquiring the necessary interests in land; and authorizing the City Attorney and his designees to institute condemnation proceedings if such interests in land cannot be acquired by purchase through good faith negotiations.

## **Key Issues:**

This Ordinance would provide for the City to use to power of eminent domain (condemnation) to acquire drainage easements, temporary construction easements and public right of way through 3 parcels for a new extension of SE Browning Street between SE Oldham Parkway and SE Hamblen Road.

File #: BILL NO. 20-188, Version: 1				
	The extension of Browning Street will provide additional access to the existing industrial development in this area as well as reducing the amount of left turn traffic on SE Oldham Pkwy near the interchange of MO 50 and MO 291.			
	The City has tried to acquire the necessary easements through negotiation but has been unsuccessful.			
	Eminent domain is used only after significant negotiations based upon appraisals have failed.			
I r ce pro ma au	posed City Council Motion: nove for adoption of an ordinance determining and declaring the necessity of acquiring for public use rain permanent easements and right of was for street construction improvements associated with the oposed Browning Street extension between SE Oldham Pkwy and SE Hamblen Rd; authorizing the city anager and his designees to negotiate for the purpose of acquiring the necessary interests in land; and thorizing the city attorney and his designees to institute condemnation proceedings if such interests in land annot be acquired by purchase through good faith negotiations.			
Th Rd be pro	e project will extend a commercial/industrial roadway, Browning St, along a planned alignment to Hamblen. The purpose of this project is to complete a roadway network gap that will improve access to the area tween Hamblen Rd and the Union Pacific Railroad, south of US 50 Hwy and north of Bailey Rd. This will evide an alternate route in lieu of Oldham Parkway in the southwest quadrant from the US-50 and M-291 erchange. This separation from Oldham Parkway is necessary to improve access to existing industrial and mmercial development due to pending access restrictions planned by MoDOT at the interchange.			
en 2,1 pro rig	e project will include two 18-foot wide lanes, sidewalks, curb and gutter, a turn lane at Hamblen, an closed storm drainage system, pavement marking, and signing. The total project length is approximately .00 feet. The project is included in the City's FY2019 Capital Improvement Plan adopted by Council. The piect will be funded from the License (Excise) Tax fees. Bartlett & West, the design engineer, has completed ht of way plans and very close to finishing final plans. However, the engineering plans cannot be finalized d advertised for construction until the right-of-way and easement requests are resolved.			
Fai	pact/Analysis: lure to obtain the necessary right-of-way and easements through eminent domain will delay the project or nificantly increase the cost of acquisition.			
Sta	neline: art: Upon approval of ordinance. aish:
