Investment Portfolio Report for the quarter ended March 31, 2021

Issue/Request:
Report

Key Issues:

This report serves as a status report of the Investment Portfolio and notes all purchases and maturities over the previous quarter.

As of March 31, 2021 the largest portion of the portfolio is invested in U.S. Government Agencies (43%), followed by US Treasuries (36%).

Cash balances earn interest and are collateralized to protect City funds.

A "Mark to Market" adjustment is required at each quarter end to recognize any change in the market value of the portfolio in the event that securities would need to be liquidated. Fair values are determined by our custodial bank.

Background:

Our primary investment objectives in order of priority are 1) safety, 2) liquidity and 3) yield.

Securities are laddered over a period not to exceed 5 years. When the yield spread between shorter term and longer term maturities is minimal, staff does not extend to the longer term maturities. Due to the currently low interest rates, new purchases have been kept to under 3 years.

To protect City funds, the City's depository banking agreement requires each bank to pledge collateral equal to the City's funds on account in excess of FDIC coverage. We hold a letter of credit from US Bank as collateral

and UMB Bank pledges securities which are held at the Federal Reserve Bank.

Bette Wordelman, Finance Director
