Discussion - Missouri Department of Transportation related projects and coordination of City communications

Issue/Request:

Discussion - Missouri Department of Transportation related projects and coordination of City communications

Key Issues:

The Missouri Department of Transportation (MoDOT) has a number of projects underway within the City of Lee's Summit. Staff would like to share with the task force the communication efforts being taken by MoDOT and the City, and provide resources on where to find the latest up to date information related to these projects. As these projects are managed by MoDOT, City staff helps facilitate communication efforts in an effort to assist MoDOT with public awareness as information is received from MoDOT.
