Ignite Comprehensive Plan Workshop

Background:

The City of Lee's Summit has been actively working on updating the City's Comprehensive Plan and has engaged Shockey Consulting to help with the update. This workshop will allow for final discussion around the main themes - choice, concentration, connection - of the Ignite Comprehensive Plan. We will discuss how community engagement and stakeholder input shaped these themes, and how the resultant future land use, development typologies, design principles, and the fiscal impact model support these themes to ensure a vibrant community with the finest quality of life for all generations. We will discuss desired housing mix based upon the scenarios provided previously and included in this packet. We will conclude with discussion regarding implementation, measures and next steps. This will be the final opportunity for your input before the final plan presentation and public hearing on May 20, 2021 and we want to conclude the workshop with your consensus and support.

The purpose of the meeting is to have a collaborative discussion on the following topics:

- Review the main themes of the Ignite Comprehensive Plan
- Discuss implementation, measures and next steps
- Reach consensus and support before the final plan presentation to the Planning Commission for adoption on May 20, 2021

Meeting Prep:

The meeting is only two hours long and we want to ensure ample time for your final discussion and input. Please review the meeting packet materials and come ready with your comments and questions.

Critical Questions for Discussion:

These are the main questions you should think about when you are reviewing the agenda packet document. We will give you a high-level overview at the meeting of each topic but wanted you to have a document that you can refer to with all the details behind the framework.

Think about...

- Do the themes support the overall community vision and direction of the Ignite Comprehensive Plan?
- Do the proposed measures provide clarity for decision-making processes and achievable outcomes for the community?
- What is the desired housing mix based upon the fiscal impact model strategies?

- What additional implementation tools and next steps will be most helpful to you as Elected Officials?

We are looking forward to a discussion about what will Fuel Our Future!

This packet contains multiple exhibits that will be utilized for the activities. The information contained in the packet includes notes and background information.
